loans, they must satisfy the following requirements:

(a) They must be mature Irish potatoes of the 1943 crop and in proper condition for storing.

(b) They must have been inspected by licensed Federal or Federal-State inspectors, or by a designated member of the county agricultural conservation committee, and, in the case of potatoes in ungraded lots, the percentage of U. S. No. 1 and U. S. No. 2 potatoes in the lot must have been estimated by such inspector.

(c) The potatoes must be in lots, as shown by such inspection, containing no more than 2 percent soft rot nor more than 3 percent dry rot, including late blight.

(d) They must be free and clear of all liens.

(e) In the case of loans to producers, the beneficial interest in the potatoes must be and must have always been in the producer.

(f) In the case of loans to cooperative associations of producers, the potatoes must have been acquired pursuant to a 1943 Potato Producer's Sales Agreement (C. C. C. Potatoes Form C) (The purpose of requiring the execution of such sales agreement is to insure that the cooperative association has the power to give a valid mortgage on the potatoes.)

(g) In the case of loans to dealers, the dealer must have purchased the potatoes of the quality upon which the amount

of the loan is computed from producers at not less than the applicable loan rate for such quality of potatoes.

§ 245.7 Preparation and execution of loan documents. All borrowers, whether producers, cooperative associations, or dealers, shall, for each loan advanced, execute a promissory note on Grain Producer's Note (C. C. C. Grain Form A (Revised)). There should first be typed across the top of the note the following legend: "Wherever the word 'grain' appears, it shall be read as 'potatoes'." Notes representing loans obtained directly from Commodity Credit Corporation should name Commodity Credit Corporation as payee. Notes representing loans obtained from lending agencies should name the lending agency as payee.

All borrowers must also execute and file or record, in accordance with the applicable State law, a Grain Chattel Mortgage (C. C. C. Grain Form AA (Revised)), securing each note, with the same legend typed across the top. The mortgage must cover all the potatoes in the lot, notwithstanding that the loan shall be computed on the basis of the U. S. No. 1 or U. S. No. 2 potatoes in the lot. The borrower must also sign the Mortgage Supplement (Loan Agreement) (1943 Potatoes) (In the case of loans on U. S. No. 2 potatoes, the form of Mortgage Supplement which bears the revision date "9/29/43" should be used. In the event the loan is on U. S. No. 1 potatoes, either this or the original form of Mortgage Supplement is satisfactory.) Such signed copy should be retained by the county committee.

The names of the holders of all existing liens on the potatoes, such as landlords, laborers, or mortgagees, must be listed in the space provided therefor on the chattel mortgage, and the lienholders so listed must execute the lienholder's waiver on the mortgage or on C. C. C. Form AB.

All blanks must be filled in with ink, indelible pencil, or typewriter, and no documents containing additions, alterations, or erasures will be accepted unless such additions, alterations, or erasures have been initialed by the borrower and the person approving the loan for the county agricultural conservation committee.

In applying for a loan, there must be submitted to the county agricultural conservation committee, with the note and chattel mortgage, inspector's certificates covering the potatoes, and in addition, in the case of loans to cooperative associations, copies of Potato Sales Agreements for all of the potatoes tendered, and, in the case of loans to dealers on purchased potatoes, executed or certified copies of all invoices or sales slips showing the price paid for such potatoes.

§ 245.8 Storage. In the case of farm-stored potatoes, the potatoes must be stored in storage facilities of sufficiently substantial and permanent construction, as determined by the county agricultural conservation committee, to insure the safe keeping of the potatoes throughout the storage season. In the case of ware-

house-stored potatoes, the potatoes must be stored in warehouses, approved by the county agricultural conservation committee, which have convenient shipping facilities, which will afford safe storage throughout the storage season, will afford protection against rodents, other animals, thieves, and weather, are frost-proof or contain a heating system sufficient to protect potatoes from frost damage, contain sufficient space and possess or have access to adequate facilities for grading, packaging, weighing, and otherwise handling potatoes, permit the regular inspection of such potatoes by the warehouseman, the county agricultural conservation committee, and Commodity Credit Corporation, and permit the segregation of each lot of potatoes in bins, which bins must be capable of being identified, and must afford adequate ventilation and drainage.

§ 245.9 Release of potatoes. At any time before the maturity of the loan, the borrower may obtain a release of all or any part of the potatoes upon payment, in the case of total redemption, or, in the case of a partial redemption for processing by the borrower, of the principal amount of the loan, plus all charges applicable thereto, together with 3 percent interest per annum, with respect to the potatoes released, and, in the case of a partial redemption for sale, upon payment of the net proceeds received from the sale of the potatoes, exclusive of the customary sales charges and, in the case of potatoes from ungraded lots, 35 cents for each hundredweight of the potatoes of the quality upon which the amount of the loan was computed, except that in no event shall such partial repayment be less than the amount loaned plus interest with respect to the potatoes released.

To obtain a release of the potatoes, the borrower should notify the lending agency from whom he obtained the loan, or, in the event the loan was obtained directly from Commodity Credit Corporation, he should notify the regional office from which such loan was obtained.

§ 245.10 Supplemental loans to dealers. To enable dealer-borrowers to offer producers a continuous market for their potatoes at support prices, Commodity Credit Corporation agrees that it will loan the dealer-borrower an additional amount on potatoes (meeting at the time of the additional loan, the requirements of an initial loan) which are held under loan on March 1, 1944; *Provided*, That, if Commodity Credit Corporation extends the date on which the loan may be repaid beyond March 1, 1944, such additional amount shall be loaned only on potatoes which are held under loan on such extended date. Such additional loan shall be in the amount by which the loan value of such potatoes for February 1944 exceeds the loan value of such potatoes at the time the original loan was made. Such loan values shall be determined in accordance with the applicable schedule appended.

Dated: September 15, 1943.

J. B. HURSON,
President.

§ 246.5 *Final date for obtaining loans.* Loans may not be obtained after February 15, 1944.

246.6 *Sweetpotatoes eligible for loans.* In order for sweetpotatoes to be eligible for such loans, they must satisfy the following requirements:

(a) They must be cured sweetpotatoes of sound, merchantable quality, packed in rigid containers, in lots of not less than 1,000 bushels, and in proper condition for storage.

(b) They must have been inspected by licensed Federal or Federal-State inspectors, or by a designated member of the county agricultural conservation committee.

(c) As shown by such inspection, they must not contain more than 1 percent of either black rot, frost injury, or soft rot or wet breakdown, and the total of any combination of these defects must not exceed 2 percent.

(d) As shown by such inspection, the sweetpotatoes must grade either U. S. No. 1 or U. S. No. 2 containing not less than 75 percent U. S. No. 1 quality, or, if in ungraded lots, they must be sound, merchantable sweetpotatoes containing not less than 50 percent U. S. No. 1 quality.

(e) They must be free and clear of all liens.

(f) In the case of loans to producers, the beneficial interest in the sweetpotatoes must be and must have always been in the producer.

(g) In the case of loans to cooperative associations of producers, the sweetpotatoes must have been acquired pursuant to a 1943 Potato Producer's Sales Agreement (C. C. C. Potato Form C) and, whether acquired green or cured, must have been acquired at not less than the applicable loan rate in the foregoing schedule at the time the sweetpotatoes were acquired. (The purpose of requiring the execution of such sales agreement is to insure that the cooperative association has the power to give a valid mortgage on the sweetpotatoes.)

(h) In the case of loans to dealers, the dealer must have purchased the sweetpotatoes, whether green or cured, from producers at not less than the applicable loan rate in the foregoing schedule at the time the sweetpotatoes were acquired.

§ 246.7 *Preparation and execution of loan documents.* All borrowers, whether producers, cooperative associations, or dealers, shall, for each loan advanced, execute a promissory note on Grain Producer's Note (C. C. C. Grain Form A (Revised)). There should first be typed across the top of the note the following legend: "Wherever the word 'grain' appears, it shall be read as 'sweetpotatoes'." Notes representing loans obtained directly from Commodity Credit Corporation should name Commodity Credit Corporation as payee. Notes representing loans obtained from lending agencies should name the lending agency as payee.

All borrowers must also execute and file or record, in accordance with the applicable State law, a Grain Chattel Mortgage (C. C. C. Grain Form AA Revised)) securing each note, with the legend: "Wherever the word 'grain' appears, it shall be read as 'sweetpotatoes'" typed across the top. The mortgage must cover all the sweetpotatoes in the lot, notwithstanding that for ungraded sweetpotatoes the loan shall be computed on the basis of the U. S. No. 1 sweetpotatoes in the lot. The borrower must also sign the Mortgage Supplement (1943 Sweetpotatoes) such signed copy to be retained by the county agricultural conservation committee.

The names of the holders of all existing liens on the sweetpotatoes, such as landlords, laborers, or mortgagees, must be listed in the space provided therefore on the chattel mortgage, and the lienholders so listed must execute the lienholder's waiver on the mortgage or on C. C. C. Form AB.

All blanks must be filled in with ink, indelible pencil, or typewriter, and no documents containing additions, alterations, or erasures, will be accepted unless such additions, alterations, or erasures have been initialed by the borrower and the person approving the loan for the county agricultural conservation committee.

In applying for a loan, there must be submitted to the county agricultural conservation committee, with the note and chattel mortgage, inspector's certificates covering the sweetpotatoes, and, in addition, in the case of loans to cooperative associations, copies of potato sales agreements for all of the sweetpotatoes

tendered, and, in the case of loans to dealers on purchased sweetpotatoes, executed or certified copies of all invoices or sales slips showing the price paid for such sweetpotatoes.

§ 246.8 *Storage.* The sweetpotatoes must be stored in warehouses, approved by the county agricultural conservation committee, which afford safe storage for sweetpotatoes throughout the storage season; afford protection against rodents, other animals, weather, and thieves; afford adequate ventilation and drainage; have been fumigated if sweetpotatoes infected with black rot were stored therein during the previous storage season; contain a heating system sufficient to properly protect sweetpotatoes from frost damage and have facilities for the grading, packaging, weighing, and otherwise handling cured sweetpotatoes; have sufficient space and facilities which will permit the segregation of each grade of sweetpotatoes to be stored therein in such a manner that the identity of each grade can be maintained; are so arranged that regular and proper inspection of stored sweetpotatoes can be made by the operator or by representatives of Commodity Credit Corporation; and are operated in such a manner that the sweetpotatoes stored therein will be properly supervised and inspected during the storage period by a competent attendant.

§ 246.9 *Release of sweetpotatoes.* At any time before the maturity of the loan, the borrower may obtain a release of all or any part of the sweetpotatoes upon payment, in the case of total redemption, or, in the case of a partial redemption for processing or any purpose other than sale, of the principal amount of the loan, plus all charges applicable thereto, together with 3 percent interest per annum, with respect to the sweetpotatoes released, and, in the case of a partial redemption for sale, upon payment of the net proceeds (gross proceeds less transportation costs and customary sales charges) received from the sale of the sweetpotatoes, less 10 cents for each bushel of sweetpotatoes in the lot released, except that in no event shall such partial repayment be less than the amount loaned, plus interest, with respect to the sweetpotatoes released.

To obtain a release of the sweetpotatoes, the borrower should notify the lending agency from whom he obtained the loan, or, in the event the loan was obtained directly from Commodity Credit Corporation, he should notify the regional office from which such loan was obtained.

§ 1599.1 *Definitions.* When used in these regulations, unless otherwise distinctly expressed or manifestly incompatible with the intent thereof:

(a) The term "Director" means the Director of Food Distribution, War Food Administration.

(b) The term "regional director" means the official in charge of the regional office of the Food Distribution Administration, War Food Administration, serving the area in which a person resides or does business (8 F.R. 9315, 11198; 15764).

(c) The term "respondent" means any person against whom a proceeding is instituted in accordance with these regulations.

(d) The term "person" means any individual, partnership, association, business trust, corporation, or any organized group of persons, whether incorporated or not.

§ 1599.2 *Meaning of words.* Words in these regulations in the singular form shall be deemed to import the plural, and, vice versa, as the case may demand.

§ 1599.3 *Institution of proceeding.* A proceeding under these regulations shall be instituted by the service of a notice upon the respondent by the regional director. The notice shall include a statement of the factual basis for, and the purpose of, the proceeding.

§ 1599.4 *Filing of answer and request for hearing.* The respondent may, within five days after service of the notice upon him, file a written answer with

the regional director setting forth his position with respect to the matters contained in the notice and, if he so desires, the respondent may, as a part of his answer, request an opportunity to be heard. The answer need not be in any particular form. The failure of respondent to file an answer shall constitute a waiver of any objection to the taking of such action as is deemed warranted.

§ 1599.5 *When a request for a hearing is not filed.* When the respondent fails to file an answer, or files an answer but does not request an opportunity to be heard, the regional director shall, on the basis of the information before him, including that contained in the answer, if such be filed, proceed as follows:

(a) When, for any reason, the regional director determines that the issues should be resolved in favor of respondent, he shall issue and cause to be served upon respondent an order dismissing the proceeding;

(b) When, in the opinion of the regional director, the facts disclose that the proceeding should be terminated by the issuance of a warning letter, he may dispose of the proceeding by serving a warning letter upon the respondent; or

(c) When the regional director determines that an order (including, but not limited to, an order suspending, revoking, or withdrawing, in any manner, any quota, license, or authorization) should be issued against the respondent, the regional director shall cause an order to be prepared for the signature of the Director and transmit the proposed order, together with the docket containing all of the papers in the proceeding, to the Director.

§ 1599.6 *When a request for hearing is filed.* When, in connection with his answer, a respondent files with the regional director a request for a hearing, a notice fixing the time and place of the hearing shall be served on the respondent as hereinafter prescribed in these regulations: *Provided*, That, if the regional director determines that the information contained in the answer should result in resolving the issues in favor of the respondent, or if, for any other appropriate reason, the regional director determines to settle the issues in favor of the respondent, the regional director may, without a hearing, issue and serve upon the respondent such order, including a warning letter, as the regional director deems advisable in finally disposing of the matter.

§ 1599.7 *Designation of presiding officer.* The hearing shall be conducted by a presiding officer designated, by the Solicitor or his representative, from among those persons authorized to hold hearings. No person who has any pecuniary interest in the outcome of the proceeding; who has participated in any investigation preceding the institution of the proceedings; or who is related to any of the parties to the proceeding shall be designated to serve as presiding officer. In case of the absence, illness, resignation, or death of the presiding officer who has been assigned to a pro-

ceeding or, in case the Solicitor or his representative determines that, for other good cause, the presiding officer should not act, the powers and duties to be performed by him in connection with the proceeding may be assigned to any other person authorized to hold hearings.

§ 1599.8 *Powers of presiding officer.* In any proceeding assigned to him, the presiding officer shall have power to:

(a) Rule upon motions and requests (all motions shall be in writing except that those made during the hearing may be stated orally)

(b) Adjourn the hearing from time to time and change the place of hearing (this power includes the right, for good cause shown, to continue the hearing so as to give the respondent a chance to appear where he has failed to appear at the designated time and place of hearing)

(c) Administer oaths or affirmations and take affidavits;

(d) Admit or exclude evidence;

(e) Issue subpoenas requiring the attendance and testimony of witnesses and the production of books, papers, and other documentary evidence;

(f) Authorize, take, or order the taking of depositions;

(g) Hear oral arguments on facts or law.

(h) Consolidate hearings where he deems such consolidation appropriate;

(i) Issue notices of hearings; and

(j) Do all acts and take all measures, necessary for the maintenance of order at the hearing and the efficient conduct of the proceeding.

§ 1599.9 *Notice of hearing.* The presiding officer, upon being designated, shall immediately prepare and have served upon the respondent a notice of hearing, requiring the respondent to appear before him at a designated time and place. The notice shall state that if the respondent does not appear as directed, his nonappearance shall be deemed a waiver of any objection to the taking of such action as is deemed warranted. The notice of hearing, fixing a date for a hearing, shall be issued within a reasonable time after the filing with the regional director of a request for hearing by the respondent.

§ 1599.10 *Prehearing conferences.* In any proceeding in which it appears that such procedure will expedite the proceeding, the presiding officer may, at any time, request the parties or their counsel to confer with him to consider: (a) the simplification of the issues, (b) the possibility of obtaining stipulations of fact and agreements with respect to documents which may avoid unnecessary proof and examination of witnesses; and (c) such other matters as may expedite and aid in the disposition of the proceeding. No transcript of such conference shall be made but there shall be prepared and filed for the record a copy of any stipulations or agreements made as a result of the conference.

§ 1599.11 *Appearances.* Parties may appear at a hearing in person or by counsel.

§ 1599.12 *Contemptuous conduct.* Contemptuous conduct by any person at a hearing shall be ground for exclusion of the person from the hearing.

§ 1599.13 *Transcript or summary of evidence.* No written transcript of the hearing is required unless requested on behalf of the War Food Administration or the respondent. If the respondent requests a transcript, he must provide for the making thereof and for the payment of expenses therefor. Where a transcript is made, two legible copies thereof shall be furnished to the presiding officer without charge within such time after completion of the taking of testimony as he shall direct. No transcript shall be made or considered part of the record until approved and certified by the presiding officer. In the event that no stenographic transcript of the testimony is taken, the presiding officer shall provide for the taking of such notes at the time of the hearing as will enable him to make a written summary of the relevant evidence received at the hearing.

§ 1599.14 *Fees and mileage.* Witnesses who are subpoenaed and who appear in the proceeding, including witnesses whose depositions are taken, shall be paid the same fees and mileage that are paid witnesses in the courts of the United States, and persons before whom depositions are taken shall be entitled to the same fees as are paid for like services in the courts of the United States, to be paid by the party at whose request the deposition is taken. Witness fees and mileage shall be paid by the party at whose instance the witnesses appear, and claims therefor, as to witnesses subpoenaed on behalf of the War Food Administration, shall be proved before the presiding officer and, as to witnesses subpoenaed on behalf of any other party, shall be presented to such party.

§ 1599.15 *Depositions.* Upon the application of a party to the proceeding, the presiding officer may, at any time, order the taking of testimony by deposition. Applications for such an order shall be in writing. The presiding officer's order for the taking of a deposition shall be served upon the parties and shall state: (a) the time and place of the examination; (b) the name of the officer before whom the examination is to be made; and (c) the name of the deponent. The deposition shall be taken before the presiding officer, or before an officer authorized by the law of the United States or by the law of the place of the examination to administer oaths, or before a person authorized by the War Food Administrator to administer oaths. The deponent shall be examined under oath or affirmation and shall be subject to cross-examination. The testimony of the deponent shall be recorded by the officer or by some person under his direction and in his presence. The officer shall certify on the deposition that the deponent was duly sworn by him and that the deposition is a true record of the deponent's testimony. He shall then securely seal the deposition, together with two copies thereof, in an envelope, and mail the same to the presiding officer, where the deposition is not taken before

the presiding officer. A deposition ordered and taken in accordance with the provisions of this section may be placed in evidence by any of the parties to the proceeding if the presiding officer finds that the use thereof will expedite the proceeding.

§ 1599.16 *Defaults and admissions.* (a) The failure of a respondent to appear at a hearing shall be deemed a waiver by him of the right to an opportunity to be heard and of any objection by him to the taking of such action as is deemed warranted by the facts. On such failure of the respondent to appear, the presiding officer shall prepare a certification as to the non-appearance of the respondent for the record and forward it, together with the docket, to the regional director. The regional director may take such action as is prescribed by § 1599.5 of these regulations.

(b) Upon the admission at the hearing by the respondent of the facts alleged in the notice served upon him, the presiding officer shall prepare a formal statement of such admission for the record. The presiding officer may, in his discretion, permit the introduction of evidence with respect to mitigating circumstances and conditions which will tend to assist in the determination of the nature of the final action to be taken. The presiding officer shall then forward the docket containing the record of the proceeding to the regional director. The regional director may thereupon take such action as is prescribed by § 1599.25 of these regulations.

§ 1599.17 *Evidence.* The testimony of witnesses at a hearing shall be upon oath or affirmation and subject to cross-examination. Any witness may, at the discretion of the presiding officer, be examined separately and apart from all other witnesses except those who are parties to the proceeding. The rules of evidence prevailing in courts of law and equity shall not be controlling. The test of admissibility shall be the reliability, relevancy, and probative force of the evidence offered. Remote hearsay and unreliable evidence, which would not be convincing to the ordinary man, should not be received. Likewise, purely cumulative evidence should be avoided whenever possible. The grounds of any objection to the admission or rejection of any evidence may be briefly stated. The transcript, if any, shall not include argument except as permitted by the presiding officer. The ruling of the presiding officer shall be a part of the transcript, if any. Evidence may be offered in written form where the parties agree. The presiding officer shall mark all of the exhibits received in evidence. Whenever practicable, an exhibit should be submitted with three copies. The refusal of a witness at a hearing to answer any question which has been ruled to be proper shall, in the discretion of the presiding officer, be ground for striking out all testimony previously given by such witness as to all matters. If a party to a proceeding or a witness refuses to testify on the ground of his privilege against self-incrimination, he shall not be compelled to testify unless directed by the

presiding officer, with the consent of the representative of the War Food Administration, to testify pursuant to Public Law 507, 77th Congress, approved March 27, 1942 (Second War Powers Act). Affidavits may be received at the discretion of the presiding officer if the evidence is otherwise admissible.

§ 1599.18 *Order of proceeding.* The presiding officer shall open the hearing with such statement of the purpose of the hearing and the procedure that will be followed as he may deem appropriate. A representative of the War Food Administration, if present, shall then proceed to introduce, either through an investigator or otherwise, such data and information as is deemed appropriate in explanation and clarification of the position of the War Food Administration. Thereafter, the respondent shall present such data and information in support of his position as he or his counsel deems appropriate and the presiding officer deems relevant. This presentation by the person affected may be in narrative form or in response to questions and may be presented through the respondent or other persons familiar with the relevant facts. At the close of the hearing the presiding officer may allow a short period for the presentation of oral argument or for a summary of the facts disclosed at the hearing and, if he deems it advisable, may allow briefs to be filed within a period prescribed by him, not to exceed five days. Where practicable, three copies of briefs shall be filed.

§ 1599.19 *Manner of service.* Service of all documents required by these regulations to be served shall be made by personal service or registered mail.

§ 1599.20 *Personal service.* Personal service shall be made upon an individual other than an infant by delivering a copy of the document to him personally or by leaving a copy thereof at his dwelling house or usual place of abode with some person of suitable age and discretion then residing therein, or by leaving a copy thereof with his agent or a responsible individual at his usual place of business, or by delivering a copy of such papers to an agent authorized by appointment or by law to receive service of process. Personal service shall be made upon an infant by serving such papers in the manner prescribed by the law of the State in which service is made for the service of summons or other like process upon any such person in an action brought in the courts of general jurisdiction of that State. Personal service shall be made upon a domestic or foreign corporation or upon a partnership or other unincorporated association which is subject to suit under a common name by delivering a copy of such papers to an officer, a managing or general agent, or to any other agent authorized by appointment or by law to receive service of process and, if the agent is one authorized by statute to receive service and the statute so requires, by also mailing a copy to such person.

§ 1599.21 *Registered mail.* Documents shall be served by registered mail

by causing to be registered and mailed a copy addressed to the individual, partnership, corporation, organization, or association, who is the respondent, at his or its last known residence, principal office, or place of business.

§ 1599.22 *Proof of service.* When service has been effected, the person making such service shall prepare the proof of service as follows: (a) in case of personal service, he shall execute a certificate showing the date, time, and place where service was effected, and the person upon whom service was effected, and the nature of the document served; and (b) in the case of service by registered mail, he shall execute a certificate showing the date, time, and place at which the document was mailed, and to whom addressed, and the nature of the document mailed, and shall attach thereto the registered mail receipt. The certificate in both cases shall disclose that the person was not a party to the proceeding and was over 18 years of age.

§ 1599.23 *When answer or request for hearing shall be deemed filed.* An answer or a request for hearing shall be deemed to have been filed on the date of mailing, as evidenced by the post mark at the place of mailing, or, if otherwise delivered to the office of the Regional Director, on the date of such delivery, as evidenced by the time it is marked "filed" in such office.

§ 1599.24 *Record.* (a) As soon as practicable after the close of the hearing, the presiding officer shall certify to the regional director an original and, where practicable, one copy of the record of the proceeding which shall contain the following:

(1) The procedural documents, including the initiating notice, the notice of hearing, and the certifications of service;

(2) The evidence received at the hearing, either stenographically transcribed or summarized by the presiding officer, including exhibits, stipulations, or other documents which have been received by the presiding officer; and

(3) Briefs, if any, received by the presiding officer.

(b) Where a summary statement of the evidence is made by the presiding officer, he shall, at the time of transmitting the record to the regional director, also submit copies of the summary statement of the evidence to the parties to the proceeding or to their representatives.

§ 1599.25 *Action by Regional Director upon receipt of docket from Presiding Officer.* Upon receipt of the docket containing the record from the presiding officer, the regional director shall, on the basis of the information before him, proceed as follows:

(a) When the regional director determines that the proceeding should be dismissed, he may issue and serve upon the respondent such order, including a warning letter, as the regional director deems advisable in finally disposing of the matter.

(b) When the regional director does not decide to terminate the proceeding as described in § 1599.25 (a) of these regulations, he shall transmit the docket,

together with his recommended order, to the Director for final action.

§ 1599.26 *Issuance and service of orders by the Director.* The Director, upon receipt of a docket containing all of the papers in the proceeding, may issue an order as recommended by the regional director or, where the Director does not follow the recommendation of the regional director, he may prepare and issue such other order as may be required to effectuate the disposition of the proceeding in the manner determined by him. The final order of the Director shall be served upon the respondent.

§ 1599.27 *Reconsideration.* The respondent may, within five days after a final order of the Director is served on him, apply in writing to the Director for reconsideration. The filing of such an application shall not stay the operation of the order unless it is otherwise directed. Facts or arguments bearing on the merits of the policy embodied in the priority or allocation order or regulation violated will not be considered.

§ 1599.28 *Modification or revocation of orders.* The Director may, upon a determination that an order issued pursuant to these regulations tends to interfere with the maintenance of an adequate supply and efficient distribution of food to meet war and essential civilian needs, modify or revoke such order. This action may be taken upon his own initiative or upon application made by persons affected by the operation of the order.

§ 1599.29 *Delegation of authority to Deputy Director of Food Distribution.* Any Deputy Director of Food Distribution, designated from time to time by the Director, may exercise the functions, duties, powers, authority, and discretion of the Director as set forth in these regulations.

Issued this 4th day of December 1943.

Acting Director of Food Distribution.

TITLE 26—INTERNAL REVENUE

Chapter I—Bureau of Internal Revenue

Subchapter A—Income and Excess-Profits Taxes

[T.D. 5309]

VICTORY AND CURRENT TAXES

In order to conform Regulations 111 (Part 29, Title 26, Code of Federal Regulations, 1943 Sup.) and the regulations prescribed by Treasury Decision 5300, approved October 1, 1943, under section 6 of the Current Tax Payment Act of 1943, relating to relief from double payments in 1943, to the provisions of Public Law 178, 78th Congress, approved October 28, 1943, relating to credits against the victory tax, such regulations are amended as follows:

PART 29—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1941

PARAGRAPH 1. There is inserted immediately preceding section 35 the following:

SECTION 2 (b) OF PUBLIC LAW 178, 78TH CONGRESS

Section 34 of the Internal Revenue Code is amended by striking out "sections 453 and 454" and inserting in lieu thereof "section 453"

SECTION 3 OF PUBLIC LAW 178, 78TH CONGRESS

The amendments made by this Act shall be applicable with respect to taxable years beginning after December 31, 1942.

PAR. 2. There is inserted immediately preceding § 29.453-1 the following:

PUBLIC LAW 178—SEVENTY-EIGHTH CONGRESS AN ACT RELATING TO CREDITS AGAINST THE VICTORY TAX

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 453 of the Internal Revenue Code (relating to the credit against the Victory tax) is amended to read as follows:

SEC. 453. CREDITS AGAINST VICTORY TAX.

(a) *Allowance of credit.* There shall be allowed as a credit against the Victory tax for each taxable year:

(1) *Single persons.* In the case of a single person, a married person not living with husband or wife, or an estate or trust, an amount equal to 25 per centum of the Victory tax or \$500, whichever is the lesser.

(2) *Heads of families.* In the case of the head of a family, an amount equal to 40 per centum of the Victory tax or \$1,000, whichever is the lesser.

(3) *Married persons.* In the case of a married person living with husband or wife:

(A) if separate returns are filed by each spouse an amount equal to 40 per centum of the Victory tax or \$500, whichever is the lesser, or

(B) if a separate return is filed by one spouse and no return is filed by the other spouse, or if a joint return is filed under section 51 (b), only one credit not exceeding 40 per centum of the Victory tax or \$1,000, whichever is the lesser.

(4) *Dependents.* For each dependent specified in section 25 (b), excluding as a dependent, in the case of a head of a family, one who would be excluded under section 25 (b) (2) (B), an amount equal to 2 per centum of the Victory tax or \$100, whichever is the lesser.

(b) *Change of status.* If for any taxable year the status of the taxpayer (other than a taxpayer who makes his return and pays his tax under Supplement T) with respect to his marital relationship or with respect to his dependents, changed during the taxable year, the amount of the credit provided by this section for such taxable year shall be apportioned, under rules and regulations prescribed by the Commissioner with the approval of the Secretary, in accordance with the number of months before and after such change. For the purpose of such apportionment a fractional part of a month shall be disregarded unless it amounts to more than half a month in which case it shall be considered as a month.

(c) *Status of Supplement T taxpayer.* If for any taxable year a taxpayer makes his return and pays his tax under Supplement T, for the purpose of the credit provided by this section, his status for such year with respect to his marital relationship or with respect to his dependents shall be determined in accordance with the provisions of section 401.

SEC. 3. The amendments made by this Act shall be applicable with respect to taxable years beginning after December 31, 1942.

PAR. 3. Section 29.453-1 is amended to read as follows:

§ 29.453-1 *Credit against victory tax.* A taxpayer subject to the victory tax

shall be allowed as a credit against such tax for each taxable year an amount determined as follows:

(a) *Single person or married person not living with husband or wife.* 25 percent of the amount of the victory tax, or \$500, whichever is the lesser.

(b) *Married person living with husband or wife where separate returns are filed by each spouse.* 40 percent of the amount of the victory tax, or \$500, whichever is the lesser.

(c) *Head of a family.* 40 percent of the amount of the victory tax, or \$1,000, whichever is the lesser.

(d) *Married person living with husband or wife where separate return is filed by one spouse and no return is filed by the other spouse.* 40 percent of the amount of the victory tax, or \$1,000, whichever is the lesser.

(e) *Married person living with husband or wife where joint return is filed.* 40 percent of the amount of the victory tax, or \$1,000, whichever is the lesser.

(f) *Estate or trust.* 25 percent of the amount of the victory tax, or \$500, whichever is the lesser.

If the taxpayer has one or more dependents for whom a credit would be allowable under section 25 (b) (2) the amounts prescribed in paragraphs (a) to (e) of this section, inclusive, shall, for each such dependent, be increased by the addition of 2 percent to the percentage amount and \$100 to the dollar amount. For example, in the circumstances described in paragraph (a) if a taxpayer has one dependent, the amounts prescribed would be increased to 27 percent of the victory tax, or \$600, whichever is the lesser. In the circumstances described in paragraph (c) if the taxpayer has three dependents, but the credit for one of such dependents is disallowed by reason of the provisions of section 25 (b) (2) (B) the percentage amount would be increased by 2 percent for each of two dependents and the dollar amount by \$100 for each of two dependents. Consequently, the amount of the victory tax credit would be 44 percent of the victory tax, or \$1,200, whichever is the lesser.

As to what constitutes dependency under section 25, see § 29.25-6.

If a taxpayer files his return for any taxable year under Supplement T (sections 400 to 404, inclusive) his status for such taxable year as to his marital relationship and with respect to his dependents, for the purpose of the victory tax credit, shall be determined in accordance with the special rules prescribed in section 401. See §§ 29.401-1 and 29.453-2.

The following examples illustrate the computation of the victory tax credit in cases involving joint and separate returns of husband and wife:

Example (1). For 1943 a husband and wife with two dependents file a joint return and have a victory tax net income (after specific exemption) of \$60,000.

Victory tax (5 percent of \$60,000)..... \$3,000
Victory tax credit:

44 percent of victory tax..... \$1,320

or

\$1,000 plus \$200..... 1,200

Whichever is the lesser..... 1,200

Example (2). For 1943 a husband and wife with two dependents (supported by the hus-

band) file separate returns. The husband has a victory tax net income (after specific exemption) of \$40,000, and the wife has a victory tax net income (after specific exemption) of \$20,000.

Computation for husband:

Victory tax (5 percent of \$40,000) --	\$2,000
Victory tax credit:	
44 percent of victory tax ---	\$880
or	
\$500 plus \$200 -----	700
Whichever is the lesser -----	700

Computation for wife:

Victory tax (5 percent of \$20,000) --	1,000
Victory tax credit:	
40 percent of victory tax ---	\$400
or	
\$500 -----	500
Whichever is the lesser -----	400

Recapitulation:

Victory tax credit of husband -----	700
Victory tax credit of wife -----	400
	1,100

In the application of section 453 (a) to a nonresident alien subject to the victory tax, the provisions of section 214, relating to exemption and credits in the case of such taxpayer, shall be applicable, and hence the additional credit for dependents provided in section 453 (a) (4) is allowed only if such taxpayer is a resident of a contiguous country.

PAR. 4. There is inserted immediately after § 29.453-1 the following new section:

§ 29.453-2 Victory tax credit where status changes during the taxable year—

(a) *General.* If the status of the taxpayer (other than a taxpayer who makes his return and pays his tax under Supplement T) with respect to his marital relationship or with respect to his dependents changes during the taxable year, the amount of the victory tax credit under section 453 and § 29.453-1 shall be apportioned according to the number of months during which the taxpayer occupied each status. For the purposes of the apportionment, a fractional part of a month shall be disregarded unless it amounts to more than one-half of a month in which case it shall be considered as a month. In general, the victory tax credit in the case of any taxpayer whose status as set forth above changed during the taxable year will be the sum of the amounts apportioned to the respective periods during which each status was occupied. If married persons file a joint return for a taxable year in which a change in the marital status occurred, then, for the purpose of computing the victory tax credit applicable to that portion of such taxable year preceding the change of status, one-half of the joint victory tax shall be attributed to each spouse. These principles may be illustrated by the following examples:

Example (1). A and B were married on August 10, 1943, each having the status of a single person prior to such date. They have no dependents. They had a combined victory tax net income (before the specific exemption) of \$25,248. The victory tax net income of each is in excess of \$624. They file a joint return for 1943. The victory tax credit in such case is computed as follows:

Victory tax for 1943 on basis of joint return 5% of \$24,000 (\$25,248 minus \$1,248) -----	\$1,200
Victory tax credit:	

SEVEN MONTHS JANUARY TO JULY, INCLUSIVE

A. Computation of victory tax credit $\frac{1}{2} \times (25\% \text{ of } \$600) \text{ or } \frac{1}{2} \text{ of } \500 : Victory tax credit equals -----	87.50
(The figure of \$87.50 applies since it is less than $\frac{1}{2}$ of \$500.)	
B. Computation of victory tax credit $\frac{1}{2} \times (25\% \text{ of } \$600) \text{ or } \frac{1}{2} \text{ of } \500 : Victory tax credit equals -----	87.50
(The figure of \$87.50 applies since it is less than $\frac{1}{2}$ of \$500.)	

FIVE MONTHS AUGUST TO DECEMBER, INCLUSIVE

Computation of victory tax credit $\frac{1}{2} \times (40\% \text{ of } \$1,200) \text{ or } \frac{1}{2} \text{ of } \$1,000$: Victory tax credit -----	200.00
(The figure of \$200 applies since it is less than $\frac{1}{2}$ of \$1,000.)	

RECAPITULATION—VICTORY TAX CREDIT

Apportioned to A -----	87.50
Apportioned to B -----	87.50
Apportioned to A and B jointly -----	200.00
Total for A and B -----	375.00

Example (2). A, a widower having two dependent children under 18 years of age, married B on July 1, 1943. They file a joint return for the calendar year 1943 showing victory tax net income of \$61,248 (before the application of the specific exemption) and a victory tax of \$3,000. The victory tax net income of each exceeded the specific exemption of \$624. The victory tax credit in such case is computed as follows:

FIRST HALF OF YEAR

A. Computation of victory tax credit $\frac{1}{2} \times (42\% \text{ of } \$1,500) \text{ or } \frac{1}{2} \text{ of } \$1,100$: Victory tax credit -----	\$315.00
(This figure applies since it is less than $\frac{1}{2}$ of \$1,100.)	
B. Computation of victory tax credit $\frac{1}{2} \times (25\% \text{ of } \$1,500) \text{ or } \frac{1}{2} \text{ of } \500 : Victory tax credit -----	187.50
(This figure applies since it is less than $\frac{1}{2}$ of \$500.)	

SECOND HALF OF YEAR

Computation of victory tax credit $\frac{1}{2} \text{ of } (44\% \text{ of } \$3,000) \text{ or } \frac{1}{2} \text{ of } \$1,200$: Victory tax credit -----	600.00
(This figure applies since it is less than $\frac{1}{2}$ of (44% of \$3,000.)	

RECAPITULATION—VICTORY TAX CREDIT

Apportioned to A -----	\$315.00
Apportioned to B -----	187.50
Apportioned to A and B jointly -----	600.00
Total -----	1,102.00

(b) Status of Supplement T taxpayer

In the case of a taxpayer making his return and paying his tax under Supplement T, relating to the optional tax on individuals with gross income from certain sources of \$3,000 or less, the status of such taxpayer shall be determined by the application of the following rules:

(1) His status both with respect to marital relationship and with respect to dependents is to be determined as of July 1 of each taxable year.

(2) If such taxpayer is not the head of a family and is not living with husband or wife or is unmarried as of July 1 of the taxable year, he shall be treated as a single person, even though in fact he may become the head of a family or be married during the taxable year subsequent to July 1.

If, for example, A and his wife, B, are not living together on July 1, 1943 and for the calendar year 1943 they elect to pay the tax under Supplement T, they are

considered as single persons for income and victory tax purposes and hence each must file a separate return. In such case, the amount of the victory tax credit is determined under section 453 (a) (1) and shall in each case be 25 percent of the victory tax or \$500, whichever is the lesser. However, in the case of a husband and wife living together on July 1, 1943, they may elect to file either joint or separate returns under Supplement T. If they elect to file separate returns, the amount of the victory tax credit provided in section 453 (a) (3) (without regard to dependents) cannot, in the case of each spouse, exceed 40 percent of the victory tax or \$500, whichever is the lesser. If such husband and wife elect to file a joint return, the amount of the victory tax credit provided in section 453 (a) (3) (without regard to dependents) cannot exceed 40 percent of the victory tax or \$1,000, whichever is the lesser.

Payments made by the husband to the wife of an amount which is includible in her gross income by reason of section 22 (k) and section 171 shall not be considered as payment by the husband for the support of any dependent.

PAR. 5. There is inserted immediately after section 454 the following:

SECTION 2 (a) OF PUBLIC LAW 178, 78TH CONGRESS

Section 454 of the Internal Revenue Code (relating to the post-war credit of Victory tax) is hereby repealed.

SECTION 3 OF PUBLIC LAW 178, 78TH CONGRESS

The amendments made by this Act shall be applicable with respect to taxable years beginning after December 31, 1942.

PAR. 6. Sections 29.454-1, 29.454-2, and 29.454-3 are stricken out.

PAR. 7. There is inserted immediately preceding § 29.456-1 the following:

SECTION 2 (c) OF PUBLIC LAW 178, 78TH CONGRESS

Section 456 of the Internal Revenue Code (relating to the 90 per centum limit on the tax imposed by chapter 1) is amended to read as follows:

SEC. 456. LIMITATION ON TAX.

The tax imposed by section 450 (Victory tax), computed without regard to the credits provided in sections 453 and 466 (e), shall not exceed the excess of 90 per centum of the net income of the taxpayer for the taxable year over the tax imposed by this chapter, computed without regard to section 450 and without regard to the credits provided in sections 31, 32, 35, and 466 (e).

SECTION 3 OF PUBLIC LAW 178, 78TH CONGRESS

The amendments made by this Act shall be applicable with respect to taxable years beginning after December 31, 1942.

PAR. 8. Section 29.456-1 is amended by striking out the first sentence and inserting in lieu thereof the following:

The amount of the victory tax, computed before the application thereto of the victory tax credit or the credit for tax withheld at the source, cannot exceed an amount representing the excess of 90 percent of the taxpayer's net income for the taxable year over the tax imposed by chapter 1, computed without regard to section 450 and the credits for foreign income tax and for tax withheld at the source, and, for taxable years beginning in 1943, before the application of section 6 of the Current Tax Payment Act of 1943.

PAR. 9. Section 29.466-5 is amended by striking out the example at the end thereof.

**PART 36—RELIEF FROM DOUBLE PAYMENTS
IN 1943**

PAR. 10. Section 36.1 is amended by striking out the last paragraph of paragraph (a).

PAR. 11. Section 36.2 is amended as follows:

(A) By striking out the figure "\$934.80" in the fourth sentence of *Example (4)* in paragraph (a) and inserting in lieu thereof the figure "\$816.53"

(B) By striking out the second paragraph of paragraph (b), which begins with the words "For the purpose of"

(C) By amending *Example (1)* in paragraph (b) to read as follows:

Example (1). Without regard to section 6, A's tax for 1942 is \$2,152, and his tax for 1943 is \$160 including net victory tax of \$30. There is no tax withheld at the source under section 143 of the Internal Revenue Code. The tax of \$160 for 1943 is, through the operation of section 6 (b) (1), increased by \$1,992, the excess of \$2,152 over \$160, thus making a total of \$2,152. To this amount is also added 25 percent of \$160, or \$40, thus making \$2,192 the aggregate tax for 1943.

(D) By striking out the second sentence of *Example (2)* in paragraph (b) and inserting in lieu thereof the following:

His tax for 1943 before withholding credits is \$750.

(E) By striking out *Example (5)* at the end of paragraph (b).

PAR. 12. Section 36.3 is amended as follows:

(A) By striking out the last paragraph of paragraph (a)

(B) By striking out the example at the end of paragraph (c) and inserting in lieu thereof the following:

Example. The tax of A for the taxable years 1942 and 1943 (computed without regard to section 6, interest or additions to the tax, and credits for tax withheld at source on wages) is \$105,000 and \$80,000, respectively. His highest surtax net income for any of the taxable years 1937 to 1940, namely, for the taxable year 1938, is \$25,000. In 1943, of his total gross income two-thirds represented ordinary income and one-third gain from the sale of capital assets taken into account in computing net income. In such case the tax of A for the taxable year 1943 will be increased, as set forth below, through the operation of subsection (b) (1) and (2) and subsection (c) (2) of section 6. The increase in such tax produced by the operation of section 6 (b) (1) and (2) is: \$105,000 minus \$80,000, or \$25,000 (representing the excess of the tax for the taxable year 1942 over the tax for the taxable year 1943) plus 25 percent of the tax for the year 1943, that is, 25 percent of \$80,000, or \$20,000, thus producing an aggregate increase under section 6 (b) of \$25,000 plus \$20,000, or \$45,000.

In the application of section 6 (c) (2) to the assumed facts, the surtax net income for the base year, namely, \$25,000, when increased by the amount of \$20,000, is \$45,000, and the tentative tax (including the net victory tax) on such amount for the year 1943 is \$21,420. In the determination of such tax the gain from the sale of capital assets was eliminated in the computation of the victory tax, and section 117 (c) (2) of the Internal Revenue Code was applied in the computation of the income tax other than the victory tax. Since 75 percent of the 1943 tax (75 percent of \$80,000) or

\$60,000, is in excess of the tentative tax thus computed, such excess of \$38,580 (\$60,000 less \$21,420) is also added to the tax for the year 1943. Thus, the total amount added to the tax otherwise computed for the taxable year 1943 consists of the amount added through the operation of section 6 (b) (1) or \$25,000; the amount added through the operation of section 6 (b) (2) or \$20,000; and the amount added through the operation of section 6 (c) (2) or \$38,580, or an aggregate increase of \$83,580.

(Sec. 62 of the Internal Revenue Code (53 Stat., 32; 28 U.S.C., 1940 ed., 62) and Pub. Law 178, 78th Cong., approved October 28, 1943)

ARTICLE I—EXPLANATION OF THE REGULATION

SECTION 1. Explanation of the regulation. The purpose of this regulation is to establish maximum prices for apple butter in sales by persons other than wholesalers and retailers (wagon wholesalers, however, are included) Prices established by this regulation are in effect from December 6, 1943.

The following sales are exempt from the provisions of this regulation: Sales

*Copies may be obtained from the Office of Price Administration.

by packers of apple butter when the aggregate of sales during the year 1943 does not exceed 500 quarts (or an equivalent amount in other container sizes) processed from apples or apple chops of the 1943 crop.

Maximum prices for the wholesalers and retailers (but not wagon wholesalers) of apple butter are governed by separate regulations which set fixed margins for these distributors according to their annual volume and manner of doing business. "Wholesalers" and "retailers" mean the persons respectively referred to as "wholesalers" and "retailers" in those regulations, except that in this regulation wagon wholesalers are treated as a distinct type of distributor.

ARTICLE II—PRICES AND PRICING METHODS

SEC. 2. *Maximum prices which packers may charge for apple butter f. o. b. factory, for sales to purchasers other than government procurement agencies.* The packers shall figure a maximum price per dozen or other unit, f. o. b. factory, for sales to purchasers other than government procurement agencies, for each brand, container type and size of apple butter. The maximum price for such an item shall be figured by adding together his base price and his permitted increase for fruit.

(a) *Base price.* The packer's base price in each case shall be his maximum price, f. o. b. factory, for the item under Maximum Price Regulation No. 232.¹ In any case where the packer figured a separate maximum price for a separate class of purchasers under § 1341.452 (f) of Maximum Price Regulation No. 232, his base price for sales to that class of purchasers shall be the maximum price so figured.

(b) *Permitted increase for fruit—(1) In general.* The packer's permitted increase for fruit shall be figured as follows: He shall subtract the sum of the weighted average costs, delivered at the factory, for 1942 fresh apples and apple chops purchased or contracted for between March 1, 1942 and October 1, 1942, as computed under § 1341.452 (a) (3) and (b) of Maximum Price Regulation No. 232, from the weighted average cost, delivered at the factory, for 1943 fresh apples and apple chops, purchased or contracted for between September 1, 1943 and December 1, 1943 (after conversion to cents per unit of the finished product). However, for the purpose of figuring his permitted increase for fruit, in computing his weighted average cost for 1943 fresh apples and apple chops the packer shall exclude from the computation any amounts paid in excess of the following amounts:

(i) In the case of fresh apples, \$1.65 per one hundred pounds delivered to the packer's customary receiving point. (The packer shall add any actual transportation charge incurred from his customary receiving point to his factory, but at rates not in excess of those paid by him during the calendar year 1941.)

(ii) In the case of apple chops, the maximum price which the packer's supplier or suppliers were entitled to charge him under Maximum Price Regulation No. 493 in the sales by which the apple chops were acquired by the packer.

(2) *In special situations.* Instead of adding the permitted increase for fruit ordinarily required by subparagraph (1) above, a packer whose maximum price under Maximum Price Regulation No. 232 was obtained from a competitor shall add the permitted increase for fruit which his most closely competitive packer is required to figure for the item. Normally "the most closely competitive packer" will be the same competitor from whom the packer got his maximum price under Maximum Price Regulation No. 232.

Likewise, a packer who obtained his permitted increase pursuant to § 1341.452 (f) of Maximum Price Regulation No. 232 from the nearest comparable packer who sells to retailers or wholesalers shall add the permitted increase for fruit which the nearest comparable packer who sells to retailers or wholesalers has figured under this regulation (converted to retail units). Normally, "the nearest comparable packer" will be the same packer from whom the packer got his permitted increase under Maximum Price Regulation No. 232. (This provision applies to a packer who during the 1941 base period sold the item being priced only to ultimate consumers other than industrial, institutional and commercial users.)

(c) *Uniform prices where the packer has more than one factory.* Any packer who packs an item of apple butter at more than one factory and whose maximum prices for the item vary by factory may establish a uniform maximum price for the item for any group of factories by figuring a weighted average of their separate maximum prices. For any two or more factories selected by the packer, this weighted average maximum price shall be figured by him as follows: He shall (1) determine the total estimated receipts which would have been obtained if his production of the item in 1942 at those factories had been sold at the separate maximum prices which are in effect (under this section) on the date of calculation, and (2) divide that figure by the total number of pounds or other units of the item included in that production. Any packer who determines a uniform maximum price for an item for any group of factories shall determine uniform maximum prices for such group of factories for all other items of apple butter produced by him.

(d) *Meaning of "weighted average cost"* "Weighted average cost" of fruit means the total amount paid or contracted to be paid for the fruit divided by the total number of pounds or other unit purchased or contracted for.

(e) *Meaning of "packer."* "Packer" means a person who processes or packs any quantity of the brand of apple butter being priced.

(f) *Meaning of "container type"* "Container type" refers to the composition or style of the container used. (a

separate price must be figured for each container type)

Examples. Tin and glass containers are different container types. Likewise, a glass container of one design is a different container type from a glass container of a substantially different design.

(g) *Allocation of costs.* In converting the cost of fruit into cost per dozen or other unit for any brand and container type and size, the cost shall be allocated in the same proportion as the same cost was allocated to that brand and container type and size in 1942.

(h) *Weights.* Where label weights are used, prices figured by weight shall be based on the weights named on the label and not on the actual fill.

SEC. 3. *Maximum prices which packers may charge for apple butter f. o. b. factory, for sales to government procurement agencies.* The packer's maximum price per dozen or other unit, f. o. b. factory, for sales to government procurement agencies of each brand, container type and size of apple butter shall be 96% of the maximum price, f. o. b. factory, for sales of the item to purchasers other than government procurement agencies.

NOTE: Supplementary Order No. 34 (7 F.R. 10779) permits special packing expenses to be added to maximum prices on sales to procurement agencies of the United States.

SEC. 4. *Delivered prices.* Any packer who regularly sold a purchaser an item of apple butter on a delivered price basis during the calendar year 1941 shall increase the maximum price for the item, figured f. o. b. factory under this regulation, by the amount of the transportation charge per unit for that item which he added to his f. o. b. shipping point price during the period February 1 to March 17, 1942. The resulting price shall be the packer's maximum delivered price for that purchaser. The packer, of course, is free to sell his goods on an f. o. b. basis. However, in that event, the f. o. b. price charged plus the actual transportation charges incurred by the buyer may not exceed the packer's maximum price figured on a delivered basis.

NOTE: Supplementary Order No. 31 (7 F.R. 9894) provides that: "Notwithstanding the provisions of any price regulation, the tax on transportation of all property (excepting coal) imposed by section 620 of the Revenue Act of 1942 shall, for purposes of determining the applicable maximum price of any commodity or service, be treated as though it were an increase of 3% in the amount charged by every person engaged in the business of transporting property for hire. It shall not be treated, under any provision of any price regulation or any interpretation thereof, as a tax for which a charge may be made in addition to the maximum price."

SEC. 5. *New container types and sizes.* The maximum price per dozen or other unit for an item of apple butter packed in any container type or size which the packer did not sell between October 1, 1942 and December 6, 1943, shall be figured as follows. He shall:

(a) *Determine the base container.* If the packer sold the same brand of apple butter between October 1, 1942 and December 6, 1943, but only in other con-

¹ 8 F.R. 2985.

tainer types or sizes, he shall first determine the most similar container type in which he is able to calculate a maximum price for that product under this regulation (even though he no longer sells that container type). From that container type he shall choose the nearest size which is 50% or less larger than the new size, or if there is no such size, 50% or less smaller (even though he no longer sells those sizes). If there is no such smaller size, he shall go to the next most similar container type and proceed in the same manner to find the base container.

Note: In most cases "the most similar container type" will be the container type which the packer is adding to or replacing, like tin which he may be replacing with glass. Where there has been only a size change, "the most similar container type" will, of course, be the same container type. This is also true in the reverse situation; where there has been a change only in container type, the "nearest size" will be the same size.

(b) *Find the base price.* The packer shall take as the "base price" his maximum price under this regulation for the product when packed in the base container. However, if this maximum price is a price delivered to the purchaser or to any point other than the packer's factory, the packer shall first convert it to a base price f. o. b. factory by deducting whatever transportation charges were included in it.

(c) *Deduct the container cost.* Taking his base price f. o. b. factory, the packer shall then subtract the direct cost of the base container. "Direct cost of the container" means the net cost, at the packer's plant, of the container, cap, label and proportionate part of the outgoing shipping carton but it does not include costs of filling, closing, labeling or packing.

(d) *Adjust for any difference in contents.* The figure obtained by this deduction shall then be adjusted, in the case of a size change, by dividing it by the number of ounces or other units in the base container and multiplying the result by the number of the same units in the new container.

(e) *Add the new container cost to get the price f. o. b. factory.* Next, the packer shall add to the adjusted figure the "direct cost of the container" in the new type and size. If his maximum price for the commodity in the base container is an f. o. b. factory price, the resulting figure is the packer's maximum price, f. o. b. factory.

(f) *Convert to a maximum delivered price, if the maximum price for the base container is on a delivered basis.* If the packer's maximum price for the product in the base container is a delivered price, he shall figure transportation charges to be added, as follows: The packer shall take the transportation charges which he first deducted to get his base price and adjust them in exact proportion to the difference in shipping weight. If for any reason the product in the new container will move under a different freight tariff classification, the packer shall figure his transportation

charges (by the same means of transportation and to the same destination) on the basis of the new shipping weight, but at the rate in effect for that freight tariff classification on March 17, 1942. Increases in tariff rates or transportation taxes made since March 17, 1942 shall not be taken into account. (Similar principles shall apply where shipping volume is the measure of the transportation charge.) The packer shall then add these transportation charges to his f. o. b. factory price for the commodity in the new container. The resulting figure is the packer's maximum delivered price.

Sec. 6. Alternative pricing method for packers. If the packer's maximum price for any item of apple butter cannot be determined under section 2 or 5, the packer may, at his election, figure his maximum price under the pricing method of this section. Under this section his maximum price shall be:

(a) His total "direct cost" per dozen or other unit of the item, figured by adding:

(1) The total actual cost per unit of all ingredients and packaging materials subject to maximum prices established by the Office of Price Administration, not in excess of the current maximum prices applying to the class of purchasers to which he belongs, plus

(2) The weighted average per unit cost, delivered at the factory, for fresh apples, excluding from the computation any amounts paid for fresh apples in excess of \$1.65 per one hundred pounds raw weight delivered to the packer's customary receiving point, plus

(3) The total actual cost per unit of every other ingredient (other than fruit) and every packaging material for which no maximum price has been prescribed by the Office of Price Administration, figured at no higher than the current market price of the ingredient or packaging material in question, plus

(4) The direct labor cost per unit figured at the October 3, 1942, wage rates, plus

(5) Transportation charges per unit by the usual mode of transportation, if the cost factors used in subparagraphs (1) (2) and (3) above, are not delivered costs; *Provided*, That these charges are customarily incurred from his customary supply point to his plant,

(b) Multiplied by a mark-up percentage, figured by dividing

(1) The maximum price established under the maximum price regulation in effect at the time of the calculation for the most closely comparable commodity then being produced by him with a cost structure similar to that of the item being priced, by

(2) His current cost of ingredients, packaging materials and direct labor of that most closely comparable commodity.

As used in this section, "most closely comparable commodity" means a food commodity which is most nearly similar and whose "direct cost" is closest to and in no event less than two-thirds of

"direct cost" of the item being priced, whose maximum price does not exceed 150% of its "direct cost" and for which the methods employed in its sale and merchandising are similar to those which will be used in the sale and merchandising of the item being priced.

As used in this section, "current" means at the time of figuring the price.

(c) The maximum prices determined under the provisions of this section shall be subject to discounts, transportation allowances or other allowances and price differentials no less favorable than those given with respect to the comparable commodity used in the calculation of the maximum price under this section.

(d) In deciding whether items of labor cost are to be applied as separate items in figuring the price or are to be treated as overhead, the packer shall follow his customary practice. Thus, if a packer treated cleaning labor as an item of overhead in March 1942, he must continue to treat it in this way when figuring the maximum price.

(e) The packer shall employ no cost factors in addition to those which he used with respect to the comparable commodity by which he determined his percentage markup under paragraph (b) and shall make no changes in the method of application of those factors which would result in a higher price.

(f) The packer shall report any maximum price figured under this section in accordance with section 17. The maximum price so reported shall be subject to adjustment at any time by the Price Administrator.

Sec. 7. Individual authorizations of maximum prices. If the packer's maximum price for any item of apple butter cannot be determined under the provisions of the applicable pricing method, and he cannot or elects not to price under section 6, he shall apply to the Office of Price Administration, Washington, D. C., for a maximum price. His application shall set forth (a) a description in detail of the item for which a maximum price is sought, including its grade and the brand name to be used, if any, the number of packages in each shipping case, and a statement of the facts which make it different from the most similar item for which he has determined a maximum price, identifying the similar item and stating its maximum price; (b) an itemized current cost break-down of the item to be priced, showing separately, according to his own system of accounts or regularly prepared operating statements, all major component cost factors (e. g. direct costs—raw materials, packaging materials and direct labor; indirect costs, such as indirect labor, factory overhead and selling, advertising and administrative cost, together with an explanation showing the method of allocation of the indirect cost factors; and freight if sold on a delivered basis) indicating whether each cost item is an actual or an estimated cost, and the identical current cost break-down of the most closely comparable food commodity which contributes substantially to his total volume of

business; (c) the desired selling price for the item, including a statement showing the necessity for the desired selling price, any discounts or allowances which should be made applicable to the desired price, and (for comparison) the maximum selling price, with discounts and allowances, for the second commodity included in paragraph (b) of this section; and (d) the method of distribution to be employed by the packer in marketing the new commodity (i. e., whether it is to be sold to wholesalers, retailers, consumers, or other classes of purchasers). Upon receipt of such application the Office of Price Administration will authorize the maximum price or a method of determining the maximum price for the applicant or for sellers of the item generally including purchasers for resale or for a class of such resellers.

Until a maximum price is authorized, the applicant may deliver the item but he may not render an invoice or receive payment for it.

Where any cost factor set forth in the application is an estimated amount, the packer shall file with the Office of Price Administration, Washington, D. C., within six months but not earlier than three months after his maximum price has been authorized, a statement showing the actual cost of that factor in his production of the item prior to the filing of such statement.

Sec. 8. *Maximum prices which distributors other than wholesalers and retailers may charge for apple butter*—(a) *Wagon wholesalers.* A "wagon wholesaler" is one who purchases the item being priced and distributes it to retailers or to commercial, industrial or institutional users from an inventory stocked in trucks or other conveyances which are under the supervision of driver salesmen who make delivery at the time and place of sale. Such wholesaler is a wagon wholesaler only for sales made in this manner.

The maximum price which a wagon wholesaler may charge for an item of apple butter shall be determined as follows:

If his supplier's maximum price under this regulation is greater than the supplier's maximum price under the maximum price regulation previously applicable to the supplier, the wagon wholesaler shall add the difference to the maximum price which he had under Maximum Price Regulation No. 255. If his supplier's maximum price under this regulation is less than the supplier's maximum price under the maximum price regulation previously applicable, the wagon wholesaler shall subtract the difference from the maximum price which he had under Maximum Price Regulation No. 255. However, in no event may the wagon wholesaler's maximum price be greater than 124% of the sum of the maximum price of the packer of the item under this regulation for sales to other wholesalers, f. o. b. factory, and

actual charges for transportation to the wagon wholesaler's customary receiving point.

If the wagon wholesaler handled apple butter before December 6, 1943, but did not handle the particular brand or container type and size being priced before that date, his maximum price for the new item shall be his net delivered cost (based on his first purchase of the item on or after December 6, 1943) multiplied by a markup factor. This markup factor shall be secured by dividing his ceiling price (as figured according to this paragraph) for the most closely comparable item of apple butter already handled by him by the net delivered cost to him of that item.

If the wagon wholesaler cannot determine his maximum price under the foregoing pricing method, his maximum price shall be the maximum price of his supplier, f. o. b. shipping point, plus incoming freight paid by him.

(b) *Distributors who are not wholesalers, wagon wholesalers or retailers.* The maximum price for an item, f. o. b. shipping point, of a distributor who is not a wholesaler, wagon wholesaler or retailer shall be the maximum price of his supplier, f. o. b. shipping point, plus incoming freight paid by him.

A "distributor" is one who purchases all he sells (for his own account) of the brand of apple butter being priced and resells it without packing or processing any part of it.

Sec. 9. *Payment of brokers.* In accordance with existing trade custom, every broker taking part in a sale in which the seller is a packer shall be considered as the agent of the seller and not the agent of the buyer. In any case, the amount paid by the buyer to the broker plus the amount paid by the buyer to the seller shall not exceed the seller's maximum price plus allowable transportation actually paid by the seller or by the broker. The term "broker" includes a "finder."

Sec. 10. *Customary discounts and allowances.* No person shall change any customary allowance, discount or other price differential to a purchaser or class of purchasers if the change results in a higher net price to that purchaser or class.

Sec. 11. *Units of sale and fractions of a cent.* (a) Amounts computed in the process of figuring a maximum price (other than the maximum price itself) shall be carried to four decimal places (hundredths of a cent). On sales to governmental agencies, the maximum price shall also be carried to four decimal places.

(b) Maximum prices shall be stated in the same general units (like pounds, dozens, etc.) in which the packer has customarily quoted prices for the product. If any figured maximum price (other than on sales to government agencies) includes a fraction of a cent, the packer shall adjust the price to the nearest fractional unit (like 1¢, ½¢, ¼¢, etc.) in

which he has customarily quoted prices for the product.

Sec. 12. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration having authority to act upon the pending request for a change in price or to give the authorization. The authorization will be given by order.

ARTICLE III—GENERAL PROVISIONS

Sec. 13. *Relationship between this regulation and Maximum Price Regulation No. 232 and the General Maximum Price Regulation.* (a) This regulation supersedes Maximum Price Regulation No. 232 with respect to sales and deliveries for which maximum prices are established by this regulation.

(b) The following sections of the General Maximum Price Regulation, as well as amendments to them, apply to sales covered by this regulation:

- (1) Transfers of business or stock in trade (§ 1499.5).
- (2) Federal and state taxes (§ 1499.7).
- (3) Sales slips and receipts (§ 1499.14).
- (4) Definitions (§ 1499.20).

Sec. 14. *Geographical applicability.* This regulation applies in the forty-eight states of the United States and the District of Columbia.

Sec. 15. *Export and import sales.* The maximum prices at which a person may export any product covered by this regulation shall be determined in accordance with the Second Revised Maximum Export Price Regulation and amendments. Sales of apple butter which has been processed or packed outside of the geographical area in which this regulation applies are not covered by this regulation except in cases where the goods being priced are located within the area at the time of sale.

Sec. 16. *When a maximum price is established.* On and after December 6, 1943, a price figured for any item becomes "established" (that is, fixed) as the packer's maximum price as soon as he has either filed the price or disclosed it to any prospective customer, whether by sale, delivery, offer, or notice of any kind: *Provided*, That the figure price is not higher than the applicable pricing

³ 8 F.R. 3096, 3849, 4347, 4486, 4724, 4978, 4848, 6047, 6962, 8511, 9025, 9991, 11055, 13721.

⁵ 8 F.R. 2988, 3946, 5164.

method allows. A maximum price for an item may be established only once, and having been established it may not be changed by the packer except (a) with the written permission of the district office of the Office of Price Administration for the area in which he is located in cases where the packer has figured his maximum price lower than the applicable pricing method allows, or (b) in cases where a change in the regulation changes the packer's applicable pricing method.

If the packer is disclosing a price lower than the one he figured, he may establish the higher figured price as his maximum price at the time of disclosure only by recording it and naming it as such, in ink, on his books, before he discloses the lower price. A packer who has not figured a price for an item, or has figured a price higher than the applicable pricing method allows, may not sell the item until he has established a maximum price for the item in accordance with the rules of this section.

Sec. 17. Records and reports. (a) Every packer who makes sales of any items covered by this regulation after the effective date hereof shall:

(1) Make and preserve for examination by the Office of Price Administration, for so long as the Emergency Price Control Act of 1942, as amended, shall remain in effect, all records of the same kind as he has customarily kept, relating to the prices which he charged for such item after the effective date of this regulation, and

(2) Preserve for examination by the Office of Price Administration for the same period all his existing records which were the basis of figuring his maximum prices in the manner directed by this regulation, showing the method used in figuring the maximum prices.

(b) Every packer who figures a maximum price under this regulation shall file with the district office of the Office of Price Administration for the area in which he is located a true copy of the calculations showing his determination of such maximum price. Such copy shall be filed within 10 days after the date of the first sale of the item for which such maximum price is so calculated.

Sec. 18. Notification of change in maximum price. With the first delivery on or after December 6, 1943 of an item of apple butter, in any case where a seller determines his maximum price under section 2, 4 or 8 of this regulation, he shall:

(a) Supply each wholesaler and retailer who purchases from him with written notice as set forth below:

(Insert date)

NOTICE TO WHOLESALERS AND RETAILERS

Our OPA ceiling price for (describe item by brand and container type and size) has been changed by the Office of Price Administration. We are authorized to inform you that if you are a wholesaler or retailer pricing this item under Maximum Price Regulation No. 421, 422 or 423, you must refigure

your ceiling price for this item on the first delivery of it to you from your customary type of supplier containing this notification on or after December 6, 1943. You must refigure your ceiling price following the rules in section 6 of Maximum Price Regulation No. 421, 422 or 423, whichever is applicable to you.

For a period of 60 days after making such change in the maximum price of an item, and with the first shipment after the 60-day period to each person who has not made a purchase within that time, each packer shall include in each case or carton containing the item the written notice set forth above, or securely attach it to the case or carton. However, for sales directly to any retailer, the packer may supply the notice by attaching it to or writing it on the invoice covering the shipment instead of providing it with each case or carton.

(b) Notify each purchaser of the item from him who is a distributor other than a wholesaler and retailer of such change in maximum price by written notice attached to or written on the invoice issued in connection with his first transaction with such purchaser on or after December 6, 1943, as follows:

(Insert date)

NOTICE TO DISTRIBUTORS OTHER THAN WHOLESALES AND RETAILERS

Our OPA ceiling price for (describe item by brand and container type and size) has been changed from \$----- to \$----- under the provisions of Maximum Price Regulation No. 498. You are required to notify all wholesalers and retailers for whom you are the customary type of supplier, purchasing the item from you on or after December 6, 1943, of any allowable change in your maximum price. This notice must be made in the manner prescribed in section 18 (a) of Maximum Price Regulation No. 498.

Sec. 19. Compliance with the regulation—(a) No selling or buying above maximum prices. Regardless of any contract or obligation, no person shall sell or deliver, or buy or receive in the course of trade, any item of apple butter, on and after December 6, 1943 at a price higher than the maximum price established for it by this regulation. However, prices lower than the maximum price may be charged and paid.

Note: Supplementary Order No. 7 (7 F.R. 5176) provides that the prohibition contained in any price regulation against buying or receiving any commodity or service at a price higher than the maximum price permitted by such regulation shall not apply to any war procurement agency, of government whose defense is vital to the defense of the United States.

(b) *Erason.* Nor shall any person evade a maximum price, directly or indirectly, whether by commission, service, transportation, or other charge or discount, premium or other privilege; by tying-agreement or other trade understanding; by any change of style of pack; by a business practice relating to grading, labeling, or packaging; or in any other way.

(c) *Enforcement.* Any person violating a provision of this regulation is subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for suspension of licenses, provided by the Emergency Price Control Act of 1942, and amendments.

(d) *Licensing.* The provisions of Licensing Order No. 1,⁵ licensing all persons who make sales under price control, are applicable to all sellers subject to this schedule or regulation. A seller's license may be suspended for violations of the license or one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

Sec. 20. General amendments. Any person seeking a general modification of this regulation may file a petition for amendment in accordance with Revised Procedural Regulation No. 1,⁶ and amendments, issued by the Office of Price Administration.

Note: Procedural Regulation No. 6 (7 F.R. 5037, 5038) provides for the filing of applications for adjustment of maximum prices for commodities or services under Government contracts or subcontracts. Supplementary Order No. 9 (7 F.R. 5444) makes the provisions of Procedural Regulation No. 6 applicable to all price regulations, with the exception of those on scrap, waste, and salvage materials.

Note: Supplementary Order No. 23 (7 F.R. 6319) provides for the filing of applications for adjustment or petitions for amendment based on a pending wage or salary increase requiring the approval of the National War Labor Board.

Sec. 21. Definitions. (a) When used in this Maximum Price Regulation No. 498 the term:

SECTION 1. Kinds of syrups and molasses covered by this regulation—(a) Commercial cane syrup. Commercial cane syrup is "cane syrup" produced in a mill comprised of six or more rollers with a twenty-four hour grinding capacity of 250 or more tons of cane. "Cane syrup" is the juice of sugar cane clarified and evaporated to a density of not less than 39 degrees Baumé at 20 degrees centigrade and contains not more than 2.5 per cent ash. It may or may not contain sulphur dioxide, used as a clarifying and bleaching agent.

(b) *Country cane syrup.* Country cane syrup is "cane syrup" produced in a mill comprised of 6 or fewer rollers, with a twenty-four hour grinding capacity of less than 250 tons of cane.

(c) *Blends of syrup containing country cane syrup.* Blends of syrup containing country cane syrup are blends which contain at least 5% by volume of "country cane syrup" as defined in paragraph (b) above.

(d) *First molasses and second molasses.* First molasses and second molasses are known as "high grade molasses" and are the products which remain after extraction of sugar from the

clarified and concentrated juice of domestically produced sugar cane before the extraction of all commercially available sucrose.

(1) First molasses is distinguishable from second molasses by its characteristic light color and mild flavor and is customarily produced by one extraction of sugar in the manufacturing process.

(2) Second molasses (including boll-back) is the product remaining from the juice of sugar cane after more than one extraction of sugar but before the extraction of all commercially available sugar. It is distinguishable from first molasses by its darker color and more pronounced molasses flavor.

SEC. 2. Prohibition against sales above maximum prices. (a) On and after December 11, 1943, or the effective date as to any amendment or revision regardless of any contract, agreement or other obligation, no person shall sell or deliver syrups or molasses specified in this regulation and no person shall in the course of trade or business buy or receive such syrups or molasses at prices higher than the maximum prices set forth in this regulation.

(b) No person shall agree, offer, solicit, or attempt to do any of the foregoing.

(c) The provisions of this section shall not be applicable to sales or deliveries of syrups or molasses specified in this regulation to a purchaser, if prior to the date when the same became effective for such syrup or molasses, it has been received by a carrier, other than a carrier owned or controlled by the seller for shipment to such purchaser.

(d) Where a packer during the year prior to March 1, 1942, customarily paid a premium above the prevailing market price for an item of syrup or molasses which is now subject to this regulation because it had a special quality of flavor or other attribute by reason of a special process in manufacturing such item, he may apply to the Office of Price Administration, Washington, D. C., for an order permitting him to continue to pay and the seller to collect the established premium above the maximum prices set forth herein for such item of syrup or molasses: *Provided, however* That he shall neither increase nor apply for an increase in the maximum prices set forth herein or in any other regulation for such item of syrup or molasses or anything made or manufactured from it, because of paying such premium.

(e) Lower prices than the maximum established by this regulation may be charged, demanded, paid or offered.

Sec. 5. Geographical applicability. The provisions of this Revised Maximum Price Regulation No. 291 shall be applicable to the 48 states of the United States and the District of Columbia.

Sec. 4. Export sales. The maximum prices at which a person may export syrups and molasses shall be determined in accordance with the 2d Revised Maximum Export Price Regulation, as amended, issued by the Office of Price Administration

*Copies may be obtained from the Office of Price Administration.

⁷ 5 F.R. 3561.

SEC. 5. *Exempt sales.* The following sales are exempt from this regulation.

(c) *Packers' maximum prices for blends of country cane syrup containing additional ingredients other than commercial cane syrup and corn syrup.* Packers may determine maximum prices for blends containing country cane syrup of the percentages set out above and additional ingredients other than commercial cane syrup and corn syrup by calculations as follows:

(1) If the blend contains more than 5% of sugar syrup the packer may add to the maximum price established for each range number in paragraphs (a) and (b) above a sum which is equal to the exact difference between the "cost" to him of the sugar syrup above 5% in the blend and an equal volume of corn syrup.

(i) "Cost" as used in this paragraph shall mean the highest legal price paid by a packer for his most recent purchase of a customary quantity of either corn syrup or the other ingredient or ingredients which he is packing in the blend. Such "cost" shall be his delivered "cost" at his plant or factory. If the packer customarily purchased any of the above mentioned items otherwise than delivered to his plant or factory he shall determine his delivered "cost" by adding the transportation charges actually paid

for delivering such item to his factory or plant at a rate not to exceed the lowest available freight rate to the f. o. b. price he paid for the item.

(2) If the packer packs a blend containing country cane syrup and any ingredient other than those provided for above, he shall add to or subtract from the maximum price established for each range number in paragraphs (a) and (b) above, the exact difference between the "cost" to him of such other ingredient and an equal volume of corn syrup and establish the maximum price for each range number listed above, pursuant to such addition or subtraction.

(3) Once the packer has determined his maximum price for any blend pursuant to (1) and (2) above, he shall not change such price except for manifest clerical error without written consent of the Office of Price Administration.

(4) If the blend contains ingredients additional to and causing more cost than those set out in paragraphs (a) and (b) and if its maximum price calculated under subparagraph (2) of this paragraph (c) is not as high as the March 1942 price which became the ceiling price provided by the General Maximum Price Regulation; the Office of Price Adminis-

tration, Washington, D. C., may authorize a maximum price for such blend based on the increased cost of raw material ingredients since March 1942, upon application made prior to March 11, 1944, showing as to such blend: (1) ingredients (2) itemized cost breakdown and selling price as of March 1942, (3) identical itemized cost breakdown as of March 1943, (4) calculation of maximum prices under subparagraph (2) above.

(d) All of the above prices in this section 8 shall be for carload lots to the wholesale and chain store warehouse trade, and to commercial, industrial, institutional or governmental users. If the packer has established any differentials for other classes of purchasers or for smaller or larger quantity sales, he shall continue such differentials. All discounts and other allowances, including those for prompt payment, shall also be continued.

(e) *Change of percentage of country cane syrup in blend resulting in a change of range number and price.* Whenever a packer desires to change the range number within which an established blend of syrup which he is packing falls by increasing or decreasing the amount of country cane syrup in the blend, he shall proceed as follows:

(1) If he wishes to increase the amount of country cane syrup in the blend so that the new blend comes within one of the higher range numbers established in paragraph (a) or (b) of this section and consequently commands a higher maximum price he must increase the total percentage of country Cane Syrup in the blend by not less than 5% by volume, for each higher range number pursuant to which he wishes to price the new blend. This increase in the percentage of country cane syrup shall be over and above the amount of country cane syrup which he packed in each blend of syrup on or prior to the 2d day of March 1943 and which he reported to the Office of Price Administration pursuant to paragraph (e) of this section.

Example 1: If a packer at or prior to the 2d day of March 1943, packed a blend in Range 4, containing 23% of country cane syrup and now desires to increase the amount of Georgia cane syrup in his blend so that he may price pursuant to Range No. 5—more than 25% but not more than 30%, he must add 5% to the 23% and pack a blend containing at least 28% of country cane syrup.

Example 2: If the above packer desires to go to Range No. 6—that is, a blend containing over 30% but not more than 35%, he must add 10% to the 23% and pack a blend containing at least 33% of Georgia cane syrup.

(2) If he wishes to decrease the amount of country cane syrup in the blend, so that the new blend comes within one of the lower range numbers and

consequently commands a lower maximum price, he may not decrease the total percentage of country cane syrup in the blend by more than 5% by volume for each lower range number pursuant to which he wishes to price the new blend. This decrease shall be below the amount of country cane syrup which he has packed in each blend of syrup on or prior to the 2d day of March 1943 and which he has reported to the Office of Price Administration pursuant to paragraph (e) of this section.

Example 1: If a packer at or prior to the 2d day of March 1943, packed a blend in Range 4, containing 23% syrup and now wishes to decrease the amount of country cane syrup in the blend so that he is required to price pursuant to Range 3—more than 15% but not more than 20% of country cane syrup, he may not reduce the amount of country cane syrup in the blend more than 5% and must put at least 18% of country cane syrup, by volume, in his blend.

Example 2: If the above packer desires to change the above 23% blend and prices his new blend pursuant to Range No. 2—that is, a blend containing more than 10% but not more than 15% of country cane syrup, he may not reduce the percentage of country cane syrup in the new blend more than 10% and must put at least 13% of country cane syrup, by volume, in his new blend.

(3) In no event shall a packer who increases the percentage of country cane syrup in his blend and prices the new blend pursuant to subparagraph (1) of this paragraph, increase the blend by less than the amount provided in said subparagraph. The increase so provided shall determine the minimum amount of country cane syrup in the blend. If he desires to alter the percentage of country cane syrup in the blend he is now pricing pursuant to subparagraph (1) to insure uniformity, he shall do so only by increasing the amount of country cane syrup, but may never decrease it. If he adds less than the percentage of country cane syrup provided in subparagraph (1) he may not increase his maximum price despite the fact that such increase may actually bring the blend within the higher range specified in paragraphs (a) and (b) of this section.

(4) In no event shall a packer who decreases the amount of country cane syrup in his blend and prices pursuant to a lower number range decrease the percentage of country cane syrup by more than 5% for each lower range to which he goes. The decrease so provided shall determine the minimum amount of country cane syrup in the blend. If he desires to alter the amount of country cane syrup in the blend he is now pricing pursuant to subparagraph (2) to insure uniformity, he may do so by increasing the amount of country cane syrup but may never decrease it. If he decreases the percentage by more than 5% per range, he shall be deemed to have de-

creased it by 10% and be required to price at the next lower range than the one in which the percentage of country cane syrup in the blend actually places it.

(f) *Reports.* Within 30 days after the 2d day of March 1943 or within 30 days after a person starts packing any blend of syrup containing country cane syrup, he shall report to the Sugar Section of the Office of Price Administration, Washington, D. C., the exact percentage by volume of all syrups which he packed in each of his blends on the 2d day of March 1943 or prior thereto when he last packed such blend, or if he did not pack country cane syrup in blends at that time or prior thereto, the exact percentage by volume of all syrups in each blend when he began packing such blends.

(1) Any packer who desires to change the percentage of country cane syrup pursuant to paragraph (d) of this section, shall report to the Sugar Section of the Office of Price Administration, Washington, D. C., at or prior to the time that he first makes such change in his blend, (1) the brand name and percentage of country cane syrup in the blend from which he is changing, (2) the amount of country cane syrup in that blend on the 2d day of March 1943, which he reported pursuant to this paragraph (e) (3) the amount of country cane syrup which he now intends to pack in the blend, and (4) a statement that he has complied with the provisions of paragraph (d) of this section.

(2) Any packer who established maximum prices pursuant to paragraph (c) of this section, shall complete and mail or otherwise deliver at or before the time of his first delivery, to each purchaser of such blends of syrup a notice to read as follows:

Our new maximum price for _____ brand of syrup is \$_____ per case of _____ (delivered in the southern zone f. o. b. Cairo, Georgia). This maximum price is authorized by the Office of Price Administration and has been established pursuant to section 8 (c) of Revised Maximum Price Regulation No. 231.

(g) *Prohibition against addition of credit or commission charges.* The maximum prices established by this section shall not be increased (1) by any charges for the extension of credit; or—(2) by commissions or any other charges.

SEC. 9. Maximum prices for syrups and molasses packed in containers other than tin cans—(a) Procedure for calculating maximum prices. A person shall calculate his maximum price for an item of syrup or molasses subject to the regulation packed in containers other than tin cans in the following manner:

(1) Determine the size of the can container which is closest in net content to the container other than a tin can;

(2) Take the maximum price for the corresponding case of this size of container;

(3) Deduct from this maximum price the total cost of cans, case and labels;

(4) Divide the resulting figure by the number of units of contents (ounces, pounds, pints or the like) in the case;

(5) Multiply the resulting figure by the number of units of contents (ounces, pounds, pints or the like) in the case for which he is determining his price;

(6) Add to the figure obtained in (5) above the total cost of the new containers, case, labels, to obtain the maximum price for the case packed in the container other than a tin can, except as provided below:

(7) Where the container other than tin for which a person is calculating a maximum price is a glass container, the following sums may be added for direct packing labor costs:

(i) Not more than 4¢ per case for that size of glass container which corresponds in net volume to the No. 10 tin can, providing that the net contents of the case of glass containers is equal to or in excess of 5 gallons.

(ii) Not more than 4½¢ per case for those sizes of glass containers which correspond in net volume to the No. 5 can, the No. 2½ can, or the No. 1½ can respectively. *Provided*, That the net contents of the case of glass containers is equal to or in excess of 5 gallons.

(iii) Where the net contents of the case of glass containers is less than 5 gallons, not more than that portion of the sum allowed in (i) or (ii) above which is equal to the proportion which the net contents of the case of glass containers bears to 5 gallons.

Example 1. Where a packer now packs a 110 liquid ounce glass jar, 6 jars to the case, he may add 4¢ per case for direct labor because the 110 liquid ounce glass jar corresponds to the No. 10 tin can, and further six 110 ounce glass jars have a net content which is equal to or in excess of 5 gallons.

Example 2: Where a packer now packs a 55 liquid ounce glass jar, 12 jars to the case, he may add 4½¢ per case because the net content of the glass jar corresponds to the No. 5 tin can and the net content of the case is equal to or in excess of 5 gallons.

Example 3: Where a packer now packs a 13 liquid ounce glass jar, 24 jars to the case, he may add 2.1938¢ per case for direct packing labor costs. This sum is arrived at as follows: The 13 liquid ounce jar corresponds to the No. 1½ tin can. The packer is therefore permitted to add 4.5¢ per case for direct packing labor if the net contents of the case is equal to or exceeds 5 gallons or 640 liquid ounces. The net contents of the case can be determined by multiplying the net volume of one

jar, 13 ounces, by the number of jars in the case, 24. Thus, $13 \times 24 = 312$ liquid ounces. This is less than 5 gallons or 640 liquid ounces. The packer is, therefore, entitled to only that part of 4.5¢ which is equal to the portion that the net contents of the case, 312 ounces, bears to 5 gallons, 640 ounces. To determine this portion, the packer must divide the net contents of the case by the number of liquid ounces in 5 gallons.

$$\frac{.4875}{640 \div 312.0000}$$

The net contents of this case is .4875 of 5 gallons. The amount the packer is entitled to add for direct labor costs is equal to this portion of 4.5¢. Thus the packer multiplies .4875 by 4.5 ($.4875 \times 4.5 = 2.19375$) and gets the sum of 2.1938¢, the amount given above in the first sentence.

(8) The figure obtained by adding the allowance provided in (7) above to the figure resulting from (6) above, is the maximum price for the appropriate case packed in glass containers.

(9) All the above calculations shall be carried to the fourth decimal of a cent.

(b) *Fractions of a cent.* In determining the sales price for cases of such other containers, the seller shall adjust fractions of one-half cent or more to the next higher cent, and fractions of less than one-half cent to the next lower cent, but only in the final calculation.

(c) *Report of prices.* A person, within ten days after determining his maximum price under the provisions of this section, shall furnish to the Office of Price Administration, Washington, D. C., the following information in a signed statement:

(1) The kind, brand and grade of the item for which a maximum price is determined;

(2) The size of the newly priced container, the net content thereof by weight or volume, and the number of containers in the case;

(3) The size of the tin container used as a base, the net content thereof by weight or volume, and the number of containers in the case;

(4) The maximum price or prices determined for each class of purchasers to which he sells;

(5) The figures showing the actual calculation of such maximum price.

(d) *Notification of the new maximum price.* Any person who determines the maximum price for an item of syrup or molasses in accordance with the provisions of this section shall accompany the first delivery of each such product to the purchaser with a statement in writing in which he shall state:

(1) The maximum price in the new container and that the price charged is at or below the maximum price:

(2) That the maximum price to such purchaser is determined in accordance with this section.

(e) *Adjustment of maximum prices.* Any price determined pursuant to this section shall be subject to adjustment at any time by the Office of Price Administration.

Sec. 10. Maximum prices for first molasses—(a) Producers' maximum prices for first molasses. Producers' maximum prices for first molasses to all classes of purchasers shall be:

\$0.38 per gallon net f. o. b. producer's mill or factory in tank cars or tank trucks furnished by the buyer.

\$0.38½ per gallon net f. o. b. producer's mill or factory in barrels or half-barrels furnished by the buyer.

Sec. 11. Maximum prices for second molasses—(a) Producers' maximum prices for second molasses. Producers' maximum prices for second molasses (boilback) to all classes of purchasers shall be:

\$0.28 per gallon net f. o. b. producer's mill or factory in tank cars or tank trucks furnished by the buyer.

\$0.28½ per gallon net f. o. b. producer's mill or factory in barrels or half-barrels furnished by the buyer.

Sec. 12. Maximum prices for syrups and molasses for which no specific price has been established. (a) The maximum price for any item of syrup or molasses subject to the provisions of this regulation which is to be sold and for which a maximum price cannot be established pursuant to this Maximum Price Regulation No. 291, shall be determined after specific authorization from the Office of Price Administration, Washington, D. C., on application setting forth (1) a description of the grade of syrup or molasses, the size of the container and the number of containers in the case of the item for which a price is sought; and (2) the factory door cost of such item. The "factory door cost" shall include all direct and indirect costs and expenses chargeable to the production of the item, but shall not include costs and expenses chargeable to administration, selling, advertising or transportation.

ARTICLE III—MISCELLANEOUS PROVISIONS

Sec. 13. Evasion. The price limitations set forth in this regulation shall not be evaded, whether by direct or indirect methods, in connection with an offer, solicitation, agreement, sale, delivery, purchase, transfer, or receipt of, syrups or molasses, alone or in conjunction with any other commodity or by way of any commission, service, trans-

portation, or other charge or discount, premium, or other privilege, or by tying-agreement or other trade understanding or otherwise. Specifically, the provisions of this regulation shall not be evaded by a producer selling syrups and molasses in tank cars, tank trucks or barrel lots at prices provided for packers by temporarily storing and repacking syrups and molasses which he would ordinarily have delivered at producers' prices after production.

SEC. 14. *Enforcement.* Any person who violates a provision of this Revised Maximum Price Regulation No. 291 is subject to the criminal penalties, civil enforcement actions, and suits for treble damages provided by Emergency Price Control Act of 1942, as amended.

SEC. 15. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery. No person may deliver or agree to deliver at a price to be adjusted upward after delivery except upon authorization of the Office of Price Administration. Such authorization may be given when a request for a change in the applicable maximum price is pending, if the authorization is deemed necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration having authority to act upon the pending request for a change in price or to whom authority to grant such authorization has been delegated. The authorization will be by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

SEC. 16. *Applicability of the General Maximum Price Regulation.* (a) This Revised Maximum Price Regulation No. 291 supersedes the provisions of the General Maximum Price Regulation with respect to the sales of syrups and molasses for which maximum prices are established by this regulation: *Provided*, That the following sections of the General Maximum Price Regulation and the amendments thereto, and Revised Supplementary Regulation 4 shall be applicable to every person making sales and deliveries covered by this Maximum Price Regulation No. 291.

- (1) § 1499.14 (Sales slips and receipts)
- (2) § 1499.15 (Registration)

- (3) § 1499.16 (Licensing) (Except at the producers level)
- (4) § 1499.29 (a) (5) (Developmental contracts)
- (5) § 1499.29 (a) (6) (Secret contracts)
- (6) § 1499.29 (a) (7) (Emergency purchases)
- (7) § 1499.29 (a) (15) (Sales or deliveries of the War Department or the Department of the Navy through such department's sales stores.)

SEC. 17. *Definitions.* (a) When used in this Revised Maximum Price Regulation No. 291, the terms:

(1) "Person" includes an individual, corporation, partnership, association, or any other organized group of persons, legal successor, or representatives of any of the foregoing, and includes the United States, or any agency thereof, any other Government, or any of its political subdivisions and any agency of any of the foregoing.

(b) Unless the context otherwise requires, the definitions set forth in section 302 of the Emergency Price Control Act of 1942, as amended, and the General Maximum Price Regulation shall apply to other terms used herein.

SEC. 18. *Records and reports.* (a) Every seller who makes sales of syrups and molasses after the effective date of this regulation shall make and preserve for examination by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, a record of all sales made showing the quantity sold, terms of sale, price received, and name and address of the purchaser, as well as all records of the same kind as he has customarily kept, relating to the prices which he charged for any of such items sold after the effective date of this regulation.

(b) Every person making sales of syrups and molasses pursuant to this regulation shall submit such reports to the Office of Price Administration and keep such other records as the Office of Price Administration may from time to time require.

SEC. 19. *Transfers of business or stock in trade.* If the business or stock in trade of a seller of syrups and molasses covered by this regulation is sold or otherwise transferred on or before the effective date of this regulation or the effective date of any amendment as to the commodities covered by an amendment, and the transferee continues the business, the maximum prices of the transferee shall be the same as those which the transferor would have been

subject to if no transfer had taken place, and his obligation to keep records sufficient to verify these prices shall be the same. The transferor shall either preserve and make available, or shall turn over to the transferee, all records of transactions prior to the transfer which are necessary to enable the transferee to comply with the record provisions contained in this regulation.

SEC. 20. *Federal and State taxes.* Any tax upon, or incident to, the sales, delivery, processing, or use of syrups or molasses imposed by any statute of the United States or statute or ordinance of any State or subdivision thereof, shall be treated as follows in determining the seller's maximum price for such syrups or molasses and in preparing the records of such seller with respect thereto:

(a) *As to a tax in effect prior to the effective date of this regulation for each kind of syrup and molasses.* (1) If the seller paid such tax, or if the tax was paid by any prior vendor, irrespective of whether the amount thereof was separately stated and collected from the seller, but the seller did not customarily state and collect separately from the purchase price prior to the effective date for such item the amount of the tax paid by him or tax reimbursement collected from him by his vendor, the seller may not collect such amount in addition to the maximum price, and in such a case shall include such amount in determining the maximum price under this regulation.

(2) In all other cases, if, at the time the seller determines his maximum price, the statute or ordinance imposing such tax does not prohibit the seller from stating and collecting the tax separately from the purchase price, and the seller does state it separately, the seller may collect, in addition to the maximum price, the amount of the tax actually paid by him or an amount equal to the amount of tax paid by any prior vendor and separately stated and collected from the seller by the vendor from whom he purchased, and in such case the seller shall not include such amount in determining the maximum price under this regulation.

(b) *As to a tax or an increase in a tax which becomes effective after the effective date of this regulation for each kind of syrup and molasses.* If the statute or ordinance imposing such tax or increase does not prohibit the seller from stating and collecting the tax or increase separately from the purchase

price, and the seller does separately state it, the seller may collect, in addition to the maximum price, the amount of the tax or increase actually paid by him or an amount equal to the amount of tax paid by any prior vendor, and separately stated and collected from the seller by the vendor from whom he purchased.

SEC. 21. *Petitions for amendment.* Any person seeking an amendment of any provision of this Revised Maximum Price Regulation No. 291 may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1, issued by the Office of Price Administration.

Effective date. This regulation shall become effective December 11, 1943.

Maximum prices f. o. b. shipping point for shipment out of California are those listed in Column 5. Maximum prices delivered at any wholesale receiving point for carlot or trucklot sales (except sales by carlot distributors) are determined by adding freight to the basing point prices listed in Column 7.

⁵ (a) These prices are maximum prices and include any amounts paid to or taken by carlot distributors as provided in Column 8.

(b) Column 9 does not apply to sales made L. C. L. at California shipping points for shipment out of California (See Column 5).

⁶ The person who breaks a carlot or trucklot for sale at auction or private sale "ex car" shall take no more than the following amounts:

As to items 1 & 2 not more than 15¢ of the markup in Column 8.

As to items 3 & 4 not more than $\frac{1}{2}\%$ of the markup in Column 8.

As to items 5 & 6 the Column 7 price plus $\frac{1}{2}\%$.

All expenses of the auction sale must be included in the amount so taken out.

PART 1345—COKE

[MPR 29]

BY-PRODUCT AND RETORT GAS COKE

Revised Price Schedule No. 29 is redesignated Maximum Price Regulation 29 and is revised and amended to read as set forth herein.

In the judgment of the Price Administrator, it is necessary and proper to bring together the provisions of Revised Price Schedule No. 29¹—By-Product Foundry and By-Product Blast Furnace Coke, and those of Maximum Price Regulation No. 121²—Miscellaneous Solid Fuels Delivered From Producing Facilities, insofar as the latter establishes maximum prices for sales by producers and distributors of by-product and retort gas coke, and to regulate maximum prices for sales of such coke under Maximum Price Regulation 29. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and filed with the Division of the Federal Register.* Reference is hereby made to the statements of considerations accompanying the several amendments to Revised Price Schedule No. 29 and, insofar as Maximum Price Regulation No. 121 and the several amendments thereto establish maximum prices for by-product and retort gas coke, to the statements of considerations accompanying that regulation and such amendments.

The Price Administrator has ascertained and given due consideration to the prices of by-product and retort gas coke prevailing between October 1 and October 15, 1941, and has made adjustments for such relevant factors as he has determined and deemed to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry affected by this regulation.

In the judgment of the Price Administrator, the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended.

§ 1345.1 *Maximum prices for by-product and retort gas coke.* Under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Orders 9250 and 9328, Maximum Price Regulation 29—By-Product and Retort Gas Coke, which is annexed hereto and made a part hereof, is hereby issued.

ARTICLE I—PROHIBITION AND SCOPE OF THE REGULATION

SECTION 1. *Prohibition against dealing in by-product or retort gas coke at prices above the maximum.* On and after December 6, 1943, regardless of any contract or other obligation:

No person shall sell or deliver by-product or retort gas coke at prices higher than the maximum prices established by this Regulation:

No person shall buy or receive by-product or retort gas coke in the course of trade or business at prices higher than the maximum prices so established; and No person shall agree, offer, solicit, or attempt to do any of the foregoing.

Sec. 2. *Prohibition against evasive practices.* (a) The price limitations set forth in this regulation shall not be evaded either by direct or indirect methods in connection with a purchase, offer, sale, delivery or transfer of by-product or retort gas coke, alone or in conjunction with any other commodity; by increasing any commission or service or transportation charge; by changing customary allowances, discounts, or other price differentials; or by tying-agreement or other trade understanding.

(b) The price limitations set forth in this regulation shall not be evaded by deteriorating the quality of coke sold or by selling for a particular use coke of a different grade or lower quality than the coke customarily sold for such use: *Provided, however,* That variations in the quality of coke resulting from circumstances beyond the control of the seller shall not be considered an evasion within the meaning of this section.

SEC. 3. *Adjustable pricing.* Any person may agree to sell at a price which may be increased up to the maximum price in effect at the time of delivery but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote production or distribution and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as

amended. The authorization may be given by the Administrator or by an official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order, except that it may be given by letter or telegram when the revision might be the granting of an individual application for adjustment.

SEC. 4. *Less than maximum prices.* Lower prices than those established by this Regulation may be charged, demanded, paid, or offered.

Sec. 5. *Geographical application.* This regulation shall apply only to sales and deliveries of by-product or retort gas coke in the forty-eight states of the United States and the District of Columbia.

Sec. 6. *Exports and imports.*—(a) *Export sales.* The maximum prices at which a person may export by-product or retort gas coke shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation.²

(b) *Imports.* The provisions of this Regulation shall not apply to sales of imported by-product or retort gas coke made by a foreign seller to an importer. They shall apply, however, to sales of such imported coke made by the importer.

(b) *What warehousemen must do.* Every warehouseman or his representative, before any sale of Burley tobacco shall (1) designate on the basket tag of such tobacco the maximum price specified in paragraph (a) of this section for the grade shown on such tag and (2) announce immediately preceding the sale of such basket and in the presence of the assembled buyers, the grade and maximum price for the tobacco to be sold.

(c) *Maximum prices of dealers—(1) Dealer's warehousing charges.* Any dealer who warehouses Burley tobacco after it is packed may make a charge for such warehousing based on the maximum price for the particular grade as set forth in paragraph (a) of this section, but not in excess of one percent of such maximum price per month for each month of warehousing.

(2) *Dealer's charges for direct order purchases.* (i) A dealer who purchases Burley tobacco on direct order may charge for services rendered in connection with the tobacco purchased, but not in excess of the following amounts:

Services	Maximum charge per 100 pounds (green weight)
Buying at auction market	\$9.60
Buying and sheeting (where dealer furnishes sheets)	75
Buying and sheeting (where dealer does not furnish sheets)	.50
Buying and green prizing	1.50
	Maximum charge per 100 pounds (finished weight)
Redrying only	\$2.10
Buying and redrying	2.60
Buying and stemming, other than scrap	7.00
Buying and hand-stemming scrap	10.00

"Purchase on direct order" means a purchase made in conformity with an agreement to buy for a principal either in the principal's name or for his account.

(ii) *Dealer's charge for supervisory services on direct order purchase.* A dealer performing supervisory services in the purchase on direct order of Burley tobacco of the 1943 crop for a particular buyer may charge a fee for such services, but not to exceed the highest customary fee charged by the dealer to the particular buyer for the same services performed with respect to purchases on direct order of the 1942 or 1941 year's crop, whichever is most recent. If the dealer performed no supervisory services for the buyer with respect to purchases on direct order of the 1942 or 1941 year's crop of that type of tobacco, the fee charged by the dealer for such supervisory services shall not exceed the highest customary fee charged therefor by the dealer with respect to pur-

chases on direct order of the 1942 or 1941-year's crop, whichever is most recent, to other buyers of the same class. A dealer who performed no supervisory services for the particular buyer or for other buyers of the same class with respect to purchases on direct order of the 1942 or 1941 year's crop, shall apply by letter to the Office of Price Administration, Tobacco Section, Washington, D. C. for authorization to charge a fee for such services based on the fee charged by his most closely competitive dealer of the same class.

"Supervisory services" means services involving responsibility for establishment of proper grade standards, correlation of grading between the several markets, selection of markets affording the greatest abundance of suitable Burley tobacco, decisions as to the rate of buying from week to week and guiding purchases through frequent visits to the several markets.

(3) *Dealer's maximum prices for tobacco purchased other than on direct order.* A dealer's maximum price for any Burley tobacco of the 1943 crop purchased by him other than on direct order shall be an amount determined by adding the following items:

(i) If the tobacco is all of the same grade, the maximum price under paragraph (a) of this section for the quantity of the particular grade (green weight), or,

(ii) If the tobacco is of mixed grades, the weighted average of the maximum prices under paragraph (a) of this section for the particular quantity of each grade (green weight) plus

(iii) The exact amount, if any, paid by the dealer to an independent carrier for transporting the tobacco from its location at the date of purchase to the dealer's nearest prizing or rehandling plant; plus

(iv) A charge for any service listed in paragraph (c) (2) (i) of this section rendered to the dealer by the buyer, but not in excess of the maximum charge under that paragraph for the particular service; plus

(v) Seven percent of the total of items (i) or (ii) and (iii) and (iv) of this subparagraph (3), or $2\frac{1}{2}$ cents per pound finished weight; plus

(vi) The actual amount of commission paid by the dealer to a tobacco broker doing business as such during and since March 1942, for the broker's services in negotiating the sale of the tobacco to a manufacturer, but not in excess of three percent of the total of the preceding items of this subparagraph; plus

(vii) The charge for warehousing, if any, permitted under paragraph (c) (1) of this section.

However, no dealer who purchases any such tobacco from another dealer shall, in computing his own maximum price therefor, increase the price charged by the dealer from whom he purchased, except to the extent of the charges permitted by this regulation for additional services rendered.

"Weighted average of the maximum prices" means the figures obtained by

Multiplying the total number of pounds of each grade purchased in each transaction by the maximum price for such grade as set forth in paragraph (a) of section 2;

Adding the resulting figures thus obtained; and

Dividing the sum thus obtained by the total number of pounds of all grades purchased in the particular transaction.

(4) *Certification by dealers.* On and after December 4, 1943, any dealer selling Burley tobacco of the 1943 crop, whether purchased by him on direct order or otherwise, shall place upon the invoice or other evidence of sale of the tobacco, given by him to the purchaser, a complete, correct and signed statement as follows:

The green weight of the Burley tobacco covered by this invoice (if other evidence of sale is used, specify) was ----- pounds. The price charged for this tobacco does not exceed our maximum price therefor permitted under Maximum Price Regulation No. 500 issued by the Office of Price Administration. The Office of Price Administration requires you to keep this statement for examination.

(Signed) -----
Seller

Only one such statement need be given by a dealer for any particular sale of Burley tobacco of the 1943 crop.

SEC. 3. *Compliance with regulation.*—(a) *No buying or selling above maximum prices after December 4, 1943.* On and after December 4, 1943, regardless of any contract, agreement or other obligation,

FEDERAL POWER COMMISSION.

[Docket No. G-510]

MANUFACTURERS LIGHT AND HEAT CO. AND
MANUFACTURERS GAS CO.

NOTICE OF APPLICATION

DECEMBER 3, 1943.

Notice is hereby given that on November 29, 1943, The Manufacturers Light and Heat Company (hereinafter referred to as "Light and Heat")¹ and Manufacturers Gas Company (hereinafter referred to as "Gas Company")¹ both of which are Pennsylvania corporations having the same principal place of business at 800 Union Trust Building, Pittsburgh 19, Pennsylvania, filed with the Federal Power Commission a joint application for certificates of public convenience and necessity under section 7 of Natural Gas Act, as amended, to authorize the construction and operation of the following described facilities:

(a) Light and Heat proposes to construct 900 feet of 20-inch and 11 miles of 16-inch pipe line beginning at point of the existing interconnection between 16-inch lines of Light and Heat and United Fuel Gas Company at Miller Farm in Sandhill District, Marshall County, West Virginia, and extending in a northeasterly direction to a point near Light and Heat's Donegal Compressor Station located in Donegal Township, Washington County, Pennsylvania, where the proposed line would be connected with a 16-

inch line of Light and Heat extending northeast a distance of 30 miles to the Hix Farm in Findley Township, Allegheny County, Pennsylvania. From that point on the Hix Farm, Light and Heat proposes to construct 12 miles of 16-inch line in a northerly direction to the Town of Monaca, Beaver County, Pennsylvania, to connect into a 16-inch line of Light and Heat's Ellwood City Compressor Station at the Beaver-Lawrence County Line. The proposed construction would complete the looping of Light and Heat's existing lines between Miller Farm in Sandhill District, Marshall County, West Virginia and Monaca, Pennsylvania.

(b) Light and Heat proposes to construct a total of five miles of 12-inch suction and discharge piping between points on its existing 12-inch and 16-inch pipelines and its Porters Falls Compressor Station.

(c) Light and Heat proposes to dismantle and remove two 1,100 hp. compressors from its Hundred, West Virginia, Compressor Station, and two 1,100 hp. compressors at its Sedalla, West Virginia, Compressor Station and install these units together with other facilities necessary to construct a 4,400 hp. gas compressor station complete with auxiliaries, cooling equipment, dehydration plant, piping, buildings and appurtenances at a proposed Hughes River site, Murphy District, Ritchie County, West Virginia. Light and Heat also proposes to move certain compressor station buildings from Hundred Compressor Station to the Hughes River site and from Sedalla Compressor Station to Hundred Compressor Station, and to make alterations and additions thereto where necessary.

(d) Gas Company proposes to install an additional 700 hp. compressor at its present Iowa Compressor Station, together with necessary pipe, valves and fittings.

(e) Light and Heat proposes to make additions to its existing Porters Falls dehydration plant and to install the necessary pipe, valves, fittings and diethylene glycol to operate the same.

(f) Light and Heat proposes to dismantle and remove one 400 hp. unit from its State Line Compressor Station and erect the same with necessary cylinder changes, after-cooling, piping, valves and fittings necessary to connect the same with Light and Heat's present discharge line at its Sedalla Compressor Station and provide for two-stage operation of this station.

As a result of the foregoing proposed alterations, installations and construction, Applicants state in the application they will be enabled to transport to northern Pennsylvania and southern New York an additional 10,000 M. c. f. over their present maximum daily demand. It is stated further in the application that Applicants propose to purchase this additional gas from the United Fuel Gas Company in West Virginia and transport the same for delivery and sale for resale for ultimate public consumption by the North Penn Gas Company and United Natural Gas Company in Pennsylvania.

Any person desiring to be heard or to make any protest in reference to said application should, on or before the 22d of December, 1943, file with the Federal Power Commission a petition or protest in accordance with the Commission's Rules of Practice and Regulations.

The Commission having on December 1, 1942 entered an order, pursuant to section 11 (e) and other applicable sections of the Act, approving, among other things, subject to certain terms and conditions, the sale of the assets of Missouri Electric to Sho-Me Power Cooperative and the use of the proceeds of such sale, together with certain other funds of Central States, to acquire by tender or purchase a portion of, or make pro rata payments upon, or both, Central States' First Mortgage and First Lien Gold Bonds, 5½% Series, due 1953 (File No. 54-42)

COLUMBIA GAS & ELECTRIC CORP. AND THE UNION LIGHT, HEAT AND POWER CO.

ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission, held at its

office in the City of Philadelphia, Pennsylvania, on the 2d day of December 1943.

Columbia Gas & Electric Corporation, a registered holding company, and The Union Light, Heat and Power Company, a subsidiary company of Columbia Gas & Electric Corporation, having filed a joint declaration and an amendment thereto, pursuant to the Public Utility Holding Company Act of 1935, particularly section 12 thereof, and Rules U-45 and U-46 promulgated thereunder, with respect to the following transactions:

Columbia Gas & Electric Corporation proposes to make a cash capital contribution of \$414,000, together with 6% interest upon such amount from December 31, 1937 to the date of the contribution, to its subsidiary, The Union Light, Heat and Power Company, for the purposes of:

(a) Eliminating an existing question as to whether some portion of the outstanding indebtedness of The Union Light, Heat and Power Company owing to Columbia Gas & Electric Corporation originated from dividends paid out of unearned or capital surplus; and

(b) Obtaining the removal of a restriction heretofore imposed by the Commission with respect to the payment of interest by The Union Light, Heat and Power Company on its 6% demand notes payable to Columbia Gas & Electric Corporation, as is more fully set forth in the Commission's Findings, Opinion and Order of January 27, 1940 (6 SEC 732).

The Union Light, Heat and Power Company will credit the capital contribution of \$414,000 to "Special Capital Surplus," which will subsequently be used for charges arising out of transactions applicable to periods prior to January 1, 1938, including adjustments required for the purpose of adjusting its utility plant account to original cost. The sum comprising the return of interest will be credited by The Union Light, Heat and Power Company to its "Earned Surplus Since December 31, 1937." The company will utilize the cash received to retire part of its open account indebtedness presently owing to Columbia Gas & Electric Corporation.

Columbia Gas & Electric Corporation proposes to increase the amount of its investment in the common stock of The Union Light, Heat and Power Company by \$414,000, representing the capital contribution, and to appropriate \$414,000 from "Special Capital Surplus" to create a reserve in that amount against said common stock investment. This reserve will be available for adjusting the investment in the common stock of The Union Light, Heat and Power Company at such time as that company may use all or some portion of the "Special Capital Surplus" created by the capital contribution. The sum comprising the return of interest to The Union Light, Heat and Power Company will be charged by Columbia Gas & Electric Corporation to its "Earned Surplus Since December 31, 1937."

Said declaration having been filed on October 14, 1943, and notice of said filing having been duly given in the form and manner prescribed by Rule U-23, promulgated pursuant to said Act, and

the amendment thereto having been filed on November 20, 1943, and the Commission not having received a request for hearing with respect to said declaration within the period prescribed in said notice, or otherwise, and not having ordered a hearing thereon; and

The Commission finding that the requirements of section 12 of the Act and Rules U-45 and U-46 of the Commission are satisfied, and that no adverse findings are necessary thereunder, and deeming it appropriate, in the public interest and in the interests of investors and consumers, to permit said declaration, as amended, to become effective;

It is hereby ordered, Pursuant to Rule U-23 and the applicable provisions of said Act and subject to the terms and conditions prescribed in Rule U-24, that the aforesaid declaration, as amended, be and hereby is permitted to become effective.

It is further ordered, That, notwithstanding that portion of this Commission's order entered under date of January 27, 1940 in the proceeding entitled "In the Matter of The Union Light, Heat and Power Company", identified by Commission's File No. 51-35, directing that:

• • • The Union Light, Heat and Power Company may make interest payments on its 6% Demand Notes without application to the Commission pursuant to Rule U-12C-3 on the next quarterly interest payment following the Commission's order in this case, but that unless The Union Light, Heat and Power Company shall have in the meantime filed with this Commission an application for the reduction of its debt by the issuance of common stock, as described in the present application, the company shall apply to the Commission pursuant to Rule U-12C-3 for approval of further interest payments.

The Union Light, Heat and Power Company may hereafter make interest payments on its 6% Demand Notes without further application to the Commission.

The other voting rights of the preferred stock remain unchanged.
